Content

Chapter 1: General Introduction	9
<u>PART 1: Personality and Metabolism</u>	17
Chapter 2: Individual variation in the (patho)physiology of energy balance.	19
Chapter 3: The passive coping Roman Low Avoidance rat, a non-obese rat model for insulin resistance.	47
Chapter 4: Coping style predicts the (in)sensitivity for developing hyperinsulinemia on a high fat diet in rats.	67
<u>PART 2: Treatment and Personality</u>	85
Chapter 5: Pharmacological treatment of insulin resistance in rats depends on coping style.	87
Chapter 6: Exercise-based control of hyperinsulinemia in rats: role of coping style and compliance.	105
Chapter 7: Passive personalities adapt physical activity levels to dietary conditions.	121
Chapter 8: Personality types and the success of life style intervention; a study in humans.	147
<u>PART 3: Anorexia Nervosa and Personality</u>	165
Chapter 9: Neurobiology of Hyperactivity and Reward in Anorexia Nervosa: agreeable restlessness in Anorexia Nervosa.	167
Chapter 10: Dopamine 1 receptor antagonism prevents hyperactivity in rats hypersensitive for Activity Based Anorexia	187
Chapter 11: Discussion	211
Nederlandse samenvatting	229
