# Contents

List of abbreviations ................................................................. 1

1 Introduction ................................................................. 3
   1.1 Motivation ................................................................. 3
   1.2 The nature of EPCM contractors .................................. 4
   1.3 The Groningen Long Term project .................................. 4
   1.4 Research aim ............................................................... 5
   1.5 Research objectives ...................................................... 7
   1.6 Thesis outline ............................................................. 14
   1.7 Note on terminology in this thesis ................................. 15

2 Process improvement concepts ............................................ 17
   2.1 Introduction ............................................................... 17
   2.2 Process management literature ..................................... 19
   2.3 An example of industrial process management questions .... 22
   2.4 Process maturity ........................................................ 24
   2.5 Conclusions ............................................................... 35

3 Engineering change management ........................................... 39
   3.1 Introduction .............................................................. 39
   3.2 Related literature and research framework ....................... 41
   3.3 Methodology .............................................................. 44
   3.4 Results ................................................................. 48
   3.5 Cross case comparison ................................................ 58
   3.6 Discussion and conclusion ........................................... 62

4 Typology of condition based maintenance ............................. 65
   4.1 Introduction .............................................................. 65
   4.2 Case study of condition based maintenance ....................... 68
   4.3 Literature review on types of condition based maintenance .. 79
   4.4 Discussion .............................................................. 83
4.5 Conclusions and further research .......................... 84

5 Condition based maintenance - industrial practice 87
  5.1 Introduction ................................................ 87
  5.2 Condition based maintenance types and processes .... 88
  5.3 Postulates .................................................. 89
  5.4 Methodology ............................................... 93
  5.5 Case firm descriptions ..................................... 94
  5.6 Results ..................................................... 97
  5.7 Discussion and conclusion ................................. 110

6 Process improvement incentives 113
  6.1 Introduction ............................................... 113
  6.2 Related literature .......................................... 115
  6.3 The model .................................................. 118
  6.4 Discussion and conclusion ................................. 132
  6.5 Managerial implications .................................... 133

7 Summary and discussion 143
  7.1 Summary of the main findings ............................. 143
  7.2 Discussion ............................................... 147
  7.3 Future research directions ................................. 149
