TABLE OF CONTENTS

Chapter 1	General introduction	9
<i>Part 1</i>	<i>The temporal dynamics of HPA axis functioning in depression</i>	<i>23</i>
Chapter 2	Chronicity of depressive problems and the cortisol response to psychosocial stress in adolescents: The TRAILS study	25
Chapter 3	Cortisol and α -amylase secretion patterns between and within depressed and non-depressed individuals	43
Chapter 4	How to assess stress biomarkers for idiographic research?	79
Chapter 5	The temporal dynamics of cortisol and affective states in depressed and non-depressed individuals: an intensive time-series approach	107
<i>Part 2</i>	<i>HPA axis functioning as a mediator of the relationship between physical activity and depression</i>	<i>129</i>
Chapter 6	Markers of stress and inflammation as potential mediators of the relationship between exercise and depressive symptoms: The TRAILS Study	131
Chapter 7	Temporal dynamics of physical activity and mood in depressed and non-depressed individuals	151
Chapter 8	Cortisol as a potential mediator of the influence of physical activity on affective states in daily life	173
Chapter 9	General discussion	185
	Samenvatting (Dutch summary)	203
	Dankwoord	213
	Curriculum Vitae	217
