List of Figures
Illustrations and photographs are by the author unless mentioned otherwise.

Fig. 1.1. Plan of a Greek House. From *Voyage du Jeune Anacharsis* by Jean-Jacques Barthélemy.

Fig. 1.2. Imaginary House of the 5th Century BCE. From *The Greek House* Bertha Carr-Rider.

Fig. 1.3. Plan and organisation of household nr. 1001 in Rotterdam. From Priemus 1980, p. 2.

Fig. 2.1. Achaia Phthiotis in Classical Antiquity.

Fig. 2.2. Location of Classical and Hellenistic Halos.

Fig. 2.3. Plan of the Hellenistic City. From Reinders 1988, 35.

Fig. 2.4. Lower city of Halos with location of excavated Houses. Drawing H.R. Reinders.

Fig. 2.5. Stratigraphy of Room 4 of the House of the Amphorae from south.

Fig. 2.6. Shattered ceramics: House of Agathon.

Fig. 2.7. House of Agathon, Halos: two rows of foundation stones. The lower row consists of flattened limestone blocks.

Fig. 2.8. House of the Coroplast. Exterior stones of the wall foundations are larger.

Fig. 2.9. Various ways of laying mudbrick.

Fig. 2.10. Mudbrick wall in recent houses in Almiros. a. Sherds within mudbrick, b. tile-fragments separate the foundation stones and the bricks, c. Straw used as temper in the mudbrick.

Fig. 2.11. Mudbrick wall of House 10 in Almiros (now destroyed), partially constructed in stone, partially in mudbrick. Note the horizontal beams protecting the wall from collapsing during an earthquake.

Fig. 2.12. Prothyra in Halos. a. House of the Coroplast; b. House of Agathon.

Fig. 2.13. Door of a house as depicted on an Attic pyxis.

Fig. 2.14. The marble leaves of the Heuzey tomb, Vergina. Late 4th century BCE. Paris, Louvre. Photograph taken from: [http://www.macedonian-heritage.gr/](http://www.macedonian-heritage.gr/)

Fig. 2.15. Gutter for excess water in House 9, housing block 7.6.

Fig. 2.16. House of the Coroplast: foundations.

Fig. 2.17. House of the Coroplast. View from the north. Photograph H.R. Reinders.

Fig. 2.18 a and b House of the Coroplast, two consecutive building phases.

Fig. 2.19. House of the Geometric Krater: foundations.

Fig. 2.20. Excavation of the House of the Geometric Krater, view from the north. Photograph H.R. Reinders.

Fig. 2.21. House of the Geometric Krater: threshold room 3 to south area. Photograph H.R. Reinders.

Fig. 2.22 a and b. House of the Geometric Krater. two building phases.

Fig. 2.23. House of the Snakes: foundations.

Fig. 2.24. House of the Snakes during excavation as seen from west.

Fig. 2.25. House of the Snakes: hearth in room 8/11 from north with pot and part of lid to the west. Photograph Ydo Dijkstra.

Fig. 2.26. House of the Snakes: stone pot with contents. Photograph Ydo Dijkstra.

Fig. 2.27. House of the Snakes reconstruction plan.

Fig. 2.28. House of the Snakes: courtyard. Section of feature B (the pit).

Fig. 2.29. House of the Snakes, courtyard. Feature B (the pit). Terracotta pendant of a Baubo figure.

Fig. 2.30. House of the Amphorae: foundations.
Fig. 2.31. House of the Amphorae as seen from the north.
Fig. 2.32. House of the Amphorae: room 4 unit 1 from north-east. Platform along western wall.
Fig. 2.33. House of the Ptolemaic Coins and House of Agathon: foundations.
Fig. 2.34. House of the Ptolemaic Coins and House of Agathon after excavation as seen from north-west.
Fig. 2.35. House of the Ptolemaic Coins: room 3. Well-preserved roof-tile
Fig. 2.36. House of the Ptolemaic Coins, room 4. Platforms.
Fig. 2.37. House of the Ptolemaic Coins, room 4. Possible reconstruction platforms.
Fig. 2.38. House of the Ptolemaic Coins, room 2 with remains of pebble floor.
Fig. 2.39 a and b. House of the Ptolemaic Coins: two building phases.
Fig. 2.40. House of Agathon after excavation in 1987. Photograph H.R. Reinders.
Fig. 2.41. House of Agathon, reconstruction of the plan.
Fig. 2.42. House of the Tub: foundations. drawing H.R. Reinders.
Fig. 3.1. The Houses of the Ptolemaic Coins and Agathon: Foundations.
Fig. 3.2. Planning of the Houses at Halos: Bonding and seams of the foundation walls of the Houses of the Ptolemaic Coins and Agathon.
Fig. 3.3. Plan of the south eastern part of the lower city of Halos with Housing blocks 7.1-8.8.
Fig. 3.4. Plan of housing blocks 6.4 and 6.5.
Fig. 3.5. House 9, (Part of) an unexcavated house in housing block 7.6.
Fig. 3.6. House 10, an unexcavated house in housing block 7.6.
Fig. 3.7. Part of the plan of the lower city at New Halos with housing blocks 2.6 - 2.8.
Fig. 3.8. House 11. An unexcavated house in housing block 2.6.
Fig. 3.9. Foundations of House A, an unexcavated house in housing block 6.2.
Fig. 3.10. Surface area and side rooms in the houses at New Halos.
Fig. 3.11. Surface area and courtyards in the houses at New Halos.
Fig. 3.12. Access analysis: The House of the Geometric Krater.
Fig. 3.13. Access analysis: the House of Agathon.
Fig. 3.14. Access analysis: The House of the Ptolemaic Coins, first and second building phases.
Fig. 3.15. Access analysis: The House of the Snakes.
Fig. 3.16. Access analysis: The House of the Tub.
Fig. 3.17. Access analysis: The house of the Coroplast: access analysis first phase and second phase of habitation.
Fig. 4.1. Tectonic fault in the northern part of the plain of Almiros. In Reinders and Prummel 2003, 236.
Fig. 4.2 a-c. Distribution of roof-tile fragments in the House of the Amphorae with the finds in the top layer compared to those of the lower layers: a displays the total sherd numbers per unit/room, b displays the total weight of roof-tile fragments found per room. c displays the average sherd size per room.
Fig. 4.3 a-c. Distribution of roof-tile fragments from the top layer and lower spits compared in the House of the Snakes: a displays the total sherd numbers per m2 in each unit/room, b displays the total weight per m2 of roof-tile fragments found per room. c displays the average sherd weight per room.
Fig. 5.1. Scattergram of CA analysis: House of the Snakes. Rooms and objects plotted in a symmetric space along axes 1 and 2.
Fig. 5.2. Scattergram of CA analysis: House of the Snakes without the courtyard: ‘Covered’ rooms and objects plotted in a symmetric space along axes 1 and 4.
Fig. 5.3. Scattergram of CA analysis: House of the Snakes without the courtyard and room.
Fig. 5.4. Scattergram of CA analysis: House of the Amphorae all rooms, areas and objects plotted in a symmetric space along axes 1 and 2.
Fig. 5.5. Scattergram of CA analysis: House of the Amphorae all rooms and areas with a majority of diagnostic items, and objects plotted in a symmetric space along axes 1 and 2.
Fig. 5.6 Scattergram of CA analysis: House of the Ptolemaic Coins all rooms and areas, and objects plotted in a symmetric space along axes 1 and 2.
Fig. 5.7. Scattergram of the CA analysis: House of the Ptolemaic Coins, all rooms and areas, without the incompletely excavated courtyard, and objects plotted in a symmetric space along axes 1 and 2.
Fig. 5.8. Scattergram of CA analysis: House of Agathon all rooms and areas, and objects plotted in a symmetric space along axes 1 and 3.
Fig. 5.10. Scattergram of CA analysis: House of the Geometric Krater: all rooms and areas, and objects plotted in a symmetric space along axes 1 and 2.
Fig. 5.11. Scattergram of CA analysis: House of the Coroplast: all rooms and areas, and objects plotted in a symmetric space along axes 1 and 2.
Fig. 6.1. Attic Lekythos with weaving scene. Metropolitan Museum of Art, New York. Fletcher Fund, 1931: no. 31.11.10.
Fig. 7.1. The plain of Almiros. In Reinders 1988, 24.
Fig. 7.2. Geological map of the environs of Halos and the Othrys Mountains. In Reinders 1988, 40.
Fig. 7.3. Distribution of sites found in the Halos Archaeological survey project.
Fig. 7.4. Land routes from Pharsalos to the Pagasitic Gulf in the Classical and Hellenistic Periods. (Map after Reinders 1988).

List of Tables

Table 3.1. House size and room sizes in the houses at New Halos.
Table 3.2. Inaccessibility, closedness and openness values: The House of the Geometric Krater
Table 3.3. Inaccessibility, closedness and openness values: The House of Agathon.
Table 3.4. Inaccessibility, closedness and openness values: The House of the Ptolemaic Coins.
Table 3.5. Inaccessibility, closedness and openness values: The House of the Snakes.
Table 3.6. Inaccessibility, closedness and openness values: The House of the Tub.
Table 3.7. Inaccessibility, closedness and openness values: The House of the Coroplast.
Table 3.8. Houses and plot size at New Halos.
Table 4.1. The total number and weight of all ceramics found in the excavated Houses at Halos, excluding those of the top layer.
Table 4.2. Number and weight of roof-tile fragments found in layer 1, spit 1 in the House of the Amphorae.
Table 4.3. Number and weight of roof-tile fragments found the lower spits in the House of the Amphorae.
Table 4.4. Number and weight of roof-tile fragments found in Layer 1, spit 1 of the House of the Snakes.
Table 4.5. Number and weight of roof-tile fragments found in the lower spits of the House of the Snakes.
Table 4.6. Diagnostic Vessels in New Halos related to the wares.
Table 6.1. Distribution of all grinding stones.
Table 6.2. Distribution of lekanae and association with other artefacts.
Table 6.3. Distribution of large storage vessels.
Table 6.4. Numbers of storage vessels per house.
Table 6.5. Distribution of items related to cooking at the Houses of Halos.
Table 6.6. Distribution of fine table ware.
Table 6.7. Distribution of pouring vessels.
Table 6.8. Distribution of fine table ware per house.
Table 6.9. Distribution of sets of loomweights in the houses at Halos.
Table 6.10. Distribution of items related to personal hygiene.
Table 6.11. Results of the Correspondence analysis and comparisons with other finds in the various rooms and areas.
Table 7.1. Absolute number of artefacts per house.
Table 7.2. Distribution of kraters in Halos.
