Being given the opportunity to do a PhD in the Animal Ecology Group of the University of Groningen was definitely the chance of a lifetime. When I came to Groningen the first time to the job interview of what finally became my PhD position I already had some idea of the quality of work that was done in the group. However, would I have known all about the high standards of scientific output, the great dedication to solid eco-evolutionary education and the almost legendary history of the Group I probably would have had even softer knees (German saying).

If I have seen a little further it is by standing on the shoulders of giants (Isaac Newton)

I first want to thank my supervisors Jan Komdeur, Joost Tinbergen and Christiaan Both, as they gave me the possibility to do this PhD. Jan, being my promoter you provided me with an optimal environment, always found words of encouragement when I was a bit discouraged and supported me in attending numerous meetings and congresses that stimulated my professional work, broaden my scientific knowledge and offered me the possibility to build up a global net-work of colleagues and friends. You provided the framework for the project and a working environment where I never had to worry about financings and, as it seemed, had almost limitless supplies at hand.

Joost, it was really great having you as a teacher during the time of my PhD. Your attitude towards sciences and nature definitely shaped my working and thinking approach. You taught me that it is always necessary and useful to question one’s own and others methods and conclusions in order to achieve the best possible analytical procedure. During our many meetings and discussions I also learned to improve my skills in clearly formulating my ideas and that even to seemingly impossible problems there are mostly solution if you just keep on searching hard enough.

Christiaan, it was really great having you as a co-supervisor and your ideas more than once kept the project-train from running out of fuel. During our meetings and discussions you were an essential mediator and translator of ideas. You also set high standards for our field work (holding the daily record for ring reading in 2005 and 2006) and taught me a lot not only about great tits but birds in general during our trips to the Jaap Deensgat and the Ezumakeeg. I hope your future career will always allow you to do field work that you love so much.

I would also like to thank the members of the reading committee, Prof. Lukas Keller, Prof. Ido Pen and Prof. Ben Sheldon for their time and effort of reading my thesis and for their comments.

Light is the task where many share the toil (Homer)

I am especially grateful to the people that build the core of the so called “tit team” and whose commitment and enthusiasm were indispensable for the success of the project. Marion, we managed a crazy project where we finally achieved our different goals
with one approach (after many trial designs on the pioneers room black board). One indispensable criterion for success was certainly that we worked so well together and complemented one another in an optimal way. I also profited greatly from your constant drive and being able to rely on you for support during discussions, analyses and writing (luckily you were only just two steps away). It was great sharing this extreme experience with you and also having you as a very social and fun PhD colleague for borrels, dinners, games and parties. Good luck with the Bavarian tits.

Richard, no doubt you deserve the titles “king of catching” and “master of the database”. Thanks a lot for your essential and reliable work in the field and on the database. You made the working process much smoother and more efficient. Thanks also for swimming and BBQ’s at the Hornsedijk and in Garnwerd.

Marco, it was thanks to your enormous working accuracy and speed that we managed to swap all those chicks perfectly on time and to my knowledge without a single mistake in sexing. What an achievement with over 10'000 sexed nestlings in five years!

I also thank the people that joined the project at various time steps and whose contributions to the field work and discussion periods were of great value. Thanks Niels for your moral support during field work and analyses and for your immensely valuable statistical advice, good luck with your future career in Seewiesen. Karen, with your calm and considerate working manner you are really a pleasant person to work with. I also greatly enjoyed the time we spend together at joint dinners and occasions outside the working sphere. Reinder, you did not have an easy start to jump in a project half way but you found your own niche quickly. Thanks for productive discussions in the pioneer room and good luck with continuing the project.

A big thanks goes also to all the master students, course students and field assistants that helped us with managing the enormous amount of field work during the four years and that allowed us to gather all these valuable data. Often your creative input improved the working speed and quality. Thanks to our master students Maarten Bleeker, Luc (poker face) te Marvelde, Jeroen Reimerink (thanks for sports alliance), Kirsten Jalvingh, Anne Vollmer, Bas van Schooten and Alexandra Haydn. Thanks also to our course students Marjan Bos, Anna Tocholska, Stefan Peneder, Lisette Woortman, Egbert van der Velde, Anna Harts, Sander Beugels, Bram Verhijen, Marlies Mulder, Thijs Glazemborg and Jelmer Poelstra and especially the 2004 students Laura Ross, Tijmen Veldhuizen, Allert Bijleveld and Kasper de Bruin for a great time in my first year. Our field and lab assistants provided excellent reliable help when it was needed most, thanks to Tamar Lok, Martin Keiser, Kim Meijer, Jeroen, Egbert and Luc.

I am also very grateful to Suus and Joice for your help with all the administrative struggle and to Dick Visser for the beautiful lay-out of the thesis.
De mensen van Staatsbosbeheer, bedankt voor de goede samenwerking tijdens de
veldwerk periode, en de mensen van de Willhelm Lodewijk van Nassau Kazerne
bedankt dat wij op het terrein mochten werken en verblijven. Hartelijk dankt aan de
huismeesters, Henk, Geert en Trijn voor de organisatie van onze kamers en voor de
gezelligheid. De mensen van de kantine, bedankt voor het lekkere (zelfs vegetarische)
eten, de koffie en de vriendelijke sfeer. Veel dank ook aan en de mannen en vrouwen
van de wacht, Anne Visser, Gea Stiekema, Rienk Mekkering, Peter Olthof en de heren
Baar en Venema, voor jullie medewerking en begrip ... een groep biologen die op het
terrein rond rennen maakt de organisatie soms een beetje ingewikkeld. Ik hoop dat de
goede samenwerking ook in toekomst zal blijven voortbestaan.

The working and living atmosphere at the BC was certainly one of the things I enjoyed
the most during the past years and where real friendships grew. Especially the “pionier
zolder” people hold a very special place in my heart as we shared many joyful
moments of coffee table tennis and pep talking. Thanks Cas for a wonderful time with
football, poker, social dinners and parties and for making me one of your paranimfen
which was a very special honour to me. Thanks Lyanne for any type of advice I could
rely on and for social game evenings. Janskili my own paranimfilii, thanks for being my
singing, shopping and gossiping mate and for you moral support whenever I needed
it.
Thanks also Carlos, Martijn (the tenor of the trio) and Jildou for a great time and for
bearing the false singing.
A big hug also to two very special men, Peter (Travolta) Dijkstra for being my salsa
partner (it was real fun) and my other paranimfilii Martijn (Teddy) for your initial
effort to improve my Dutch, for being my own private IT advisor and for being such a
crazy dancer and great personality, I am honoured to have you and Janske stand by
my side at my defence.
I also thank all the other BC people for a superb time. Martijn vdP you were always a
enormous help I could rely on for statistical problems and thanks for all the nice
gaming. Thanks to Amanda, Arne (Sumpfohreule und Waldschnepe in einer Nacht),
Caroline, Chris (Weihen-Frau), Claudia (birding Kumpel), Ciska (thanks a lot for
offering me your room for a good start), Frits (for all the coffee), Goetzili (master of
ping pong), Eelke, Elske, Julia, Jeroen, Kevin, Kobus (boss of the BBQ), Liz, Maaike de
H, Maaike V, Michael, Nick, Oskar, Pedro, Peter K, Popko, Roos K, Theresa, Thor and
Yvonne.
Thanks also to all the other members of the Animal Ecology group for discussions and
where I learned to ask critical questions, keep it up!

Also outside the BC there are people that I want to thank for making my stay in the
Netherlands a pleasant and social one. Thanks Martine and Roos V for social evenings,
movie times and a lot of rememberable Oud en nieuw moments. Chris W, Serge and
Anne thanks for a great time in the Sontweg building.
In der Fremde erfährt man, was die Heimat wert ist (Ernst Wiechert)

Coming all the way from hilly and narrow Switzerland to flat and open Groningen to do a PhD was not an easy made decision as it meant being parted for a long time from friends, family and partner. I am therefore deeply grateful to those people that let me go and also made being away much easier by regular visits and phone calls. Allen voran möchte ich meiner Familie und besonders meinen Eltern danken für all die Unterstützung, die ich während meiner Kindheit, Schulzeit, Studiums und während meiner Zeit in den Niederlanden erfahren habe. Von euch habe ich wichtige Werte und Normen vermittelt bekommen die, so glaube ich, die Grundvoraussetzung für die Entwicklung eines kritischen und offenen, wissenschaftlichen Geistes waren. Eure vielen Besuche bei mir in Groningen und die fast wöchentlichen Telefonate waren eine enorme Stütze und halfen mir, dass ich mich an mehreren Orten zugleich daheim fühlen konnte. Dank auch an meine beiden Brüder Alex und Robbie, denen ich wohl meine „Ellbogen“ zu verdanken habe. Eine solche, vielleicht etwas verrückte, Familie ist eines der besten Dinge, die einem widerfahren können. Ein grosses Dankeschön geht auch an meine „schweizer“ Freundinnen die mir über die ganze Zeit die Treue gehalten haben, obwohl ich oft Monate lang im Feld verschollen war. Wie ein Sprichwort sagt: „Freunde verstädigen sich nicht, sie verstehen sich“! Merci Gaby, dass ich deine Trauzeugin sein durfte, es war mir eine Ehre. Fabi R danke für deine vielen Besuche bei mir in Groningen, es war jedesmal ein Aufsteller. Leider konnte ich dir in schwierigen Zeiten nur von weitem beistehen, in Zukunft wird das sicher besser. Merci Fabi S für die Freundschaft auf Distanz all die Jahre und hoffentlich nun auch mehr denn je. Merci auch Lött vor allem für die netten Damen-Dinners und die vielen Lacher.

Zuletzt möchte ich natürlich der wichtigsten Person überhaupt danken. Martin, ohne deine Unterstützung wäre ich wohl nie so weit gekommen. Vielen Dank, dass du mich bei meinem Entschluss, eine Diss im Ausland zu machen, so tatkräftig unterstützt hast, auch wenn es nicht leicht war, 2 1/2 Jahre getrennt zu leben. Die regelmässigen Besuche und täglichen Telefonate waren in dieser Zeit ein wahres Lebenselexir. Erst als du zu mir nach Groningen kamst, wurde deutlich, was mir zum richtig glücklich sein gefehlt hat. Danke, dass du mir wärend all der Höhen und Tiefen zur Seite standest und stehst!

Stephanie  Buchs, 16.11.2009
