Acknowledgements
Remembering the first day I came to Groningen and looking back, it has been a long way, longer than expected in advance. Nevertheless, getting a PhD would never have been the same without the way; a way sparkled with high motivations but also demotivating phases and importantly, with several new and old friends as well as colleagues. This section is especially for the many people who accompanied and are still accompanying my way and life.

The most important person on my way providing great advices and supervising my educational way is Theo. Thank you very much for the times you spend on giving me the patience and forcing my perfectionism, making my thesis a great piece of work. Many thanks to Han for the initiation of my project, one of the three projects supported by the Robert-Bosch Foundation. Thanks also to the participants of the refrigerator club sessions: Franjo, Leo, Ido, Victor as well as my PhD colleagues Barbara, Bernd (tall) and Verena. I enjoyed our great discussions advancing our joined project on Darwin and Arrhenius. In this context I also want to thank the reading committee Brian, Owen and Han for the useful comments on our and my manuscripts as well as the great discussions we had on the various conferences we met.

In addition I want to thank my colleagues from the Department of Plant Physiology for their support and helpful suggestions in our work discussions joined by the group of Molecular Plant Biology. Special thanks to de “lekker grapjes van duitse” committee: Marten, taking care of my education as well as coffee availability and Frank for his help in genetic issues. Many thanks also to the fellow-PhD students who came (and left) during my time at the Department: Mark, Ana, Liping, Desirée, Aleksandra, Hamid, Hossein, Ika, Wouter, Fatma and Muhammad for exchanging ideas on several issues on managing the way of a PhD. Thanks also to Luit, his wife and Ineke for the nice days we had in Creswick and Melbourne as well as for organizing such an awesome conference there. I also want to thank Dick for the very nice outline of my thesis, Conny for designing the cover, Ono and Margot for their help in histological examinations as well as Jannie, Ger, Joke and Carole for organising administrative issues as well as my courses and trips.

Beside my experiences within the group there are several people, who joined me during my time in Groningen in good times and bad times. Thank you to the girls evening club, Vivian, my "AOK" housemate, Ika and Rozemarijn, my paranymphs, Barbara, Tina, Violetta, Sara and Kristin, but also to my friends Bernd (Grilly), Bernd (tall) and Sanne, Desirée, Harold, Asia, Martin and Julia. I often look back to the great times we spent during evenings and weekends on dining, Caiipirinha mixing and drinking, partying, surfing, scuba diving, climbing and playing touch rugby, but also to the weekends we spent on moving furniture through Groningen. In this context I also would like to thank the people from the Touch Rugby Group and the Calamari Dive Club.

Furthermore I want to thank my long lasting friends Ivi, Jassi, Gaby and Heidi as well as Lilly, Rieke and Michi. It's great to have friends like you joining my way and life. Especially I want to thank Malte, for his support, help and friendship as well as his
friends for the good times in Kiel. Further I want to thank my friends from the University Diving Club in Kiel and Forschungstauchzentrum, I always enjoyed the times we spent in the swimming pool and aside.

Although my life changed a lot during the time in Groningen, one important thing existed in advance and came back the recent years, the MS Seefuchs diving tours. Many thanks to Schnurzel alias Thomas F., for organising the diving tours, the captains Clausi, Ole and Karsten as well as the diving team. Es ist immer wieder schön euch wiederzusehen, so wie in diesem Jahr und hoffentlich im nächsten Jahr!

One member of the Seefuchs diving team is special and won my heart. He supported me whenever I needed help and showed me that I can rely on him below and above the water surface. Danke Conny! - es ist schön, dass es dich gibt - „Die Summe unseres Lebens sind die Stunden in denen wir liebten.“ (Wilhelm Busch 1832-1908). In addition I want to thank his parents, Ilse and Hans-Jürgen as well as his brother Oliver for admitting me in their family as well as his friends for the great times we spent together so far.

Very special thanks go to my family, to my mum helping and supporting me all my life. Whatever I decided to do and plan to do - Danke, dass du mir Wege zeigst und gibst - as well as my dad, for providing tips and tricks to manage life as well as circumventing logic: „Reine Logik und menschliches Verhalten vertragen sich nicht.“ Paul Watzlawick (1921-2007). Further I want to thank my brother as well as my sister and her husband - für den Zusammenhalt, dessen Bedeutung mir im Laufe der Jahre immer deutlicher wird; sowie meiner Patentante Mia und Onkel Günther, Tante Elfriede, Tante Marianne und Onkel Paul für ihre Unterstützungen auf meinem Lebensweg.
