RIJKSUNIVERSITEIT GRONINGEN

Pyrolysis Oil Upgrading to Transportation Fuels by
Catalytic Hydrotreatment

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. F. Zwarts,
in het openbaar te verdedigen op
vrijdag 4 december 2009
om 13.15 uur

door

Jelle Wildschut

geboren op 2 januari 1981
te Franeker

Promotor : Prof. dr. ir. H.J. Heeres

Copromotores : Dr. I.V. Melián-Cabrera
Dr. ir. R.H. Venderbosch

Beoordelingscommissie : Prof. dr. A.A. Broekhuis
Prof. dr. F. Picchioni

Contents:

Contents:	7
Summary	11
Samenvatting	15
Chapter 1: An Introduction to the Hydroprocessing of Biomass Derived Pyrolysis oil	19
1. Introduction	20
1.1 Pyrolysis oil properties	21
1.2 Pyrolysis oil upgrading by hydrodeoxygenation	23
2. History of bio-oil hydrotreating	25
2.1 Feed	28
2.2 Catalysts	29
2.2.1 Deactivation by water	30
2.2.2 Deactivation by coking	30
2.2.3 Deactivation by nitrogen compounds	31
2.2.4 Deactivation by metal deposits	31
2.2.5 Deactivation due to sintering	31
2.3 Reagent gas	32
2.4 Reactor configurations	32
2.4.1 Batch wise operation	32
2.4.2 Continuous packed bed reactors	33
3. Product properties of hydrotreated fast pyrolysis oil	36
3.1 Introduction	36
3.2 Product properties	36
3.2 Product representation: the Van Krevelen diagram	39
4. Hydrogen consumption and process implications	41
5. Thesis outline	44
References	46
Chapter 2: Hydrotreatment of Fast Pyrolysis oil using Heterogeneous Noble Metal Catalysts	51
1. Introduction	52
2. Materials and Methods	54
2.1 Materials	54
2.2 Hydrodeoxygenation experiments	55
2.3 Analyses of the HDO oils	56
2.3.1 GC/MS and 2D-GC analyses	56
2.3.2 Elemental composition, higher heating value (HHV), water content, flashpoint, viscosity and NMR analyses	57
2.4 Gas phase analyses	58
2.5 Chemisorption and physisorption measurements	58
3. Results and Discussion	59
3.1 Selected catalysts and screening conditions	59
3.1.1 Mild HDO of pyrolysis oil	60
3.1.2 Deep HDO of pyrolysis oil	63
3.1.3 Deep HDO of pyrolysis oil	63
3.1.4 Hydrogen consumption for the deep HDO process	69

3.1.5 Energy distribution.....	70
3.2 Product Properties and Molecular Composition of the deep HDO oils.....	71
3.3.1 ¹ H- NMR analysis of pyrolysis oil and HDO oil.....	72
3.3.2 Multidimensional GC-FID analysis of pyrolysis oil and HDO oil.....	75
4. Conclusions.....	77
Acknowledgements.....	78
References.....	79
Chapter 3: Insights in the Hydrotreatment of Fast Pyrolysis Oil using a Ruthenium on Carbon Catalyst.....	83
1. Introduction.....	84
2. Materials and Methods.....	86
2.1 Materials.....	86
2.2 Hydrodeoxygenation experiment.....	86
2.3 Analyses of the HDO oils.....	87
2.3.1 GC/MS and 2D-GC analyses.....	87
2.3.2 Elemental composition, NMR analyses and water content.....	88
2.4 Gas phase analyses.....	88
2.5 Solvent-solvent fractionation.....	88
3. Results and Discussion.....	90
3.1 Effect of reaction time on product yield and deoxygenation level.....	90
3.2 Hydrogen consumption.....	93
3.3 Carbon distribution as a function of time.....	95
3.4 Composition of the product oils.....	96
3.5 Molecular insights by product fractionation using solvent-solvent extraction.....	99
3.6 Reaction network/pathways.....	100
4. Conclusions.....	102
Acknowledgements.....	103
References.....	103
Chapter 4: Ru/C Catalysts for the Hydrotreatment of Fast Pyrolysis oil: Insights in Catalyst Stability using an Integrated Approach.....	107
1. Introduction.....	108
2. Materials and Methods.....	111
2.1 Materials.....	111
2.2 Catalyst preparation.....	111
2.3. Experimental setups.....	112
2.3.1 Fast pyrolysis oil hydrotreatment.....	112
2.3.2 Catalytic hydrotreatment reactions of phenol.....	113
2.4 Analysis of the various liquid phases.....	113
2.5 Gas phase analysis.....	114
2.6 Catalyst characterization.....	114
3. Results and Discussion.....	116
3.1 Experimental studies on the stability of the Ru/C catalyst for the hydrotreatment of fast- pyrolysis oil.....	116
3.2 Hydrotreatment experiments with Ru/C prepared with different Ru-precursors and loadings.....	120

3.2.1 Hydrotreatment experiments using phenol	120
3.2.2 Hydrotreatment of pyrolysis oil using various Ru/C catalysts	123
3.3 Catalyst characterization	127
3.3.1 ICP analysis of the catalysts	127
3.3.2 Characterization of Ru/C catalysts by TEM	127
3.3.3 Chemi- and physisorption data for the Ru/C catalysts	130
4. Conclusions	133
Acknowledgements	134
References	134
Chapter 5: Catalytic Hydrotreatment of Fast Pyrolysis oil: Model Studies on Reaction	
Pathways for the Carbohydrate Fraction.	139
1. Introduction	140
1.1 This work	144
2. Materials and Methods	145
2.1 Chemicals	145
2.2 Hydrogenation set-up	145
2.3 Liquid analyses	146
2.4 Gas phase analyses	147
3. Results and discussion	148
3.1 Hydrotreatment of D-glucose	148
3.1.1 Experiments using a Ru/C catalyst	148
3.1.2 Hydrotreatment of D-glucose using a Pd/C catalyst	151
3.2 Catalytic hydrotreatment of D-cellobiose	152
3.3 Catalytic hydrotreatment of D-sorbitol	154
3.4 Catalytic hydrotreatment of glucose using Ru/C in the presence of acetic acid, acetaldehyde and acetone	155
3.5 Solids formation as a function of process conditions, catalyst and co-reagent	157
3.6 Reaction pathways and implications for catalytic fast-pyrolysis hydrotreatment	158
4. Conclusions	160
Acknowledgements	160
References	161
Chapter 6: Experimental Studies on the Performance of Catalytically Hydrotreated Fast	
Pyrolysis oil in a Stationary Diesel Engine	165
1. Introduction	166
2. Material and Methods	168
2.1 Chemicals	168
2.2 Experimental setup	169
2.2.1 Hydrotreatment of fast pyrolysis oil	169
2.3 Engine testing	169
2.4 Analyses	170
2.4.1 Oil analysis	170
2.4.2 Gas phase analysis	171
2.5 Scanning Electron Microscopy	171
3. Results and discussion	171

3.1 Preparation and properties of hydrotreated fast pyrolysis oil	171
3.2 Engine testing.....	173
3.2.1 Engine tests with mild HDO oil.....	174
3.2.2 Engine tests with mild HDO oil under loaded and non loaded conditions. ..	174
3.2.3 Engine test with 2 nd stage HDO oil.....	175
3.2.4 Emissions of HDO oils versus diesel.....	176
3.3 Analysis of the injector nozzle.....	177
4. Conclusions.....	181
Acknowledgements.....	182
References.....	182
Nomenclature.....	185
Dankwoord.....	187
List of Publications.....	189
