The research leading to these results has received funding from the European Union Seventh Framework Programme (FP7/2007-2013) under grant agreement n°261433 (Biobank Standardisation and Harmonisation for Research Excellence in the European Union - BioSHaRE-EU).

The Lifelines Biobank initiative has been made possible by funds from FES (Fonds Economische Structuurversterking), SNN (Samenwerkingsverband Noord Nederland) and REP (Ruimtelijk Economisch Programma).

Printing of this dissertation was supported by the University Medical Center Groningen, the University of Groningen, and the Graduate School SHARE of the University Medical Center Groningen. Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged.
