Acknowledgments

So it is time for few last and personal words. During last 4 years and 7 months of my stay in Groningen, I met a lot of people outside and inside the work circle that contributed to make this voyage possible and enjoyable.

First, a few words to my research supervisor, Nico Bos. Dear Nico, thank you very much for having invited me here to Groningen to carry out this thought-provoking research. You were instrumental in guiding my research from designing an experiment, analyzing the outcome to writing an article. It was always pleasure to share with you the new results and your constant cheering, interest and enthusiasm allowed me to do good science.

I would like to express my special thanks to my promoter Maikel P. Peppelenbosch. Maikel you are the role model for me in my research career. You critical inputs during many decision-making process is very much appreciated. I value your encouragement which helped me to develop my research career. I am highly grateful for your regular Monday work meetings in Gouden Zweep and discuss many innovative ideas on science and philosophy which I am going to miss.

Next, I would like to thank the thesis reading committee members Prof. dr. C.G.M. Kallenberg, Prof. dr. J.H. Kleibeuker and Prof. dr. F.G.M. Kroese for providing valuable comments and suggestions.

It would have not been possible for me to carry out my PhD work without the collaboration with other groups. My collaborators in Gastroenterology group, especially Gerard Dijkstra, Klaas Nico, Lisette Bok deserve a special word. Gerard, thanks for all those human material and regular work meetings during my entire research work. Thanks to Wijnand Helfrich, Douwe Samplonius and Edwin Bremer for providing me the crucial construct. I would also extend my special thanks to Sjögren’s syndrome group specially Justin Pijpe, Jiska Meijer and Hendrika Bootsma. I would like to thank Juke Lolkema, Ravikanth Reddy, Erik Geertma and Bert Poolman from GBB providing an opportunity to work with Lactococcus lactis I would like to thank Finn-Eirik Johansen, Norway for providing me with pIGR containing construct.

This work has been the result of many experiments performed in the immunology lab. Judy Bun has been instrumental for showing me the lab (in particular immunohistology staining) as well as Groningen at the beginning of my PhD. I appreciate your presence in India on the occasion of my brother wedding. Lisa my Paranimfen, thanks for your help in molecular biology techniques and wonderful
time in lab. Annie, thanks for giving permission to order the reagents immediately.
Very important is to thank the people from my AIO room: Sylvia, Nienke, Peter, Karla, Lu and Jacobus. My Dear Colleagues past and present, Kaushal, Victor Geanina, Maaike, Manon, Mark, Silvia, Andre, Flip, Jan Rozing, Jan-Luuk, Frans, Jeroen (thanks for your critical correction of my introduction), Rist-Nienke, Davina, Paul Nieuwenhuis. You all made working very enjoyable not only in the lab but also the wonderful labdag and social meetings.

Gerry simplified up all those administrative affairs and all things related to my stay here in the Netherlands. Specially thanks to Greetje, for you help in research administrative things and translating many pages of Dutch letters and the continuous support in various ways. I really enjoyed our roken pauze I would like to express my gratitude to Caesar Hulstaert for your help in arrangements upon my arrival in Groningen.

The work with students: Saed, Anke, Maaike, Eidurus, Johan, Ulke, Rajesh, Annelies and Rob has been very useful. I thoroughly enjoyed teaching you all. Saed, your wonderful experiment is highly appreciated and good luck with your project.

Working with the guest scientist was great fun. Jiri, Zussana, Thomas and Thomas, Milo (Prague) we did good experiments, good luck with your project. Monica, it was really really great working with you and your tips for protein experiment is highly appreciated. Your critical comment in my thesis was very useful. The Brazilian crew: Carmen, Willian (Mr.BMP), Giselle and Roberta. Carmen your hard working style have inspired me many times when I was tired of experiment and motivated me to do good experiments.

I wish my thanks to GUIDE office in particular, Riekje Banus, Maaike Bansema, Prof de Leij and Prof. Hans Moshage. The GUIDE courses and meeting were very useful. TRIO meeting was an ideal place to discuss our ideas.

Ramesh Mavthur, my special thanks for all your moral support from our college days till my PhD. Your inspiring discussion from last decade prompted me to develop a scientific career. Good luck with your PhD. Thank you Umakanth for your support during my stay in Groningen. Being a Physicist you helped me in doing some biological experiments. Your helped my to write my entire thesis I really appreciate it and good wishes for your new life in Scotland.

The Indian group in Groningen made me to feel at home. I thank “The Da Costastraat Restaurant” owner, Kasinath (good wishes for your new phase of life), my co-worker Veerakumar (good luck in Texas), Bindhu and Shamsudheen. Ramesh your problem solving solutions made our stay very easy in Groningen and good luck for your future. In for those nice evening and weekends. My heartily
Acknowledgments

thanks to, Prasanth, Ajay, Sameer, Ananth, Navare, Vinay, Anil, Sugat, Avinash, Abdul, Nibu, Shivje, Chetan, JP, Esvar, Guru, Shiva, Pramod, Loknath and many more. I would like to thank Masilamani, Mallikarjun Lalgondar, Sunil, Manjunath Karpanalli, PrakashMK, BalajiOR, Abhiman, Chethan Nagarajan, Bremen gang, Marburg gang, Prashanth, Akshay Heblikar (Ecowatch) Masilamani Vasanth, Vadiraj, Raghuvandra and others. I would like to thank my teachers Dr. Sukhada Mohandas, Dr. S. Chandrasheker, Dr. B.V. Navaneeth, Dr. Azeez, Dr. K. Manjunath and Prof. S.B.Sullia. Special thanks goes to Rajesh (Balaji Litho press Vellore) for helping me in getting all my document arranged.

Other than research I was involved in many sport, so I would like to thank the member of basketball, ice-skating, climbing, running, and swimming teams. Dear friend Bas Prins, my Paranimfen we had a wonderful time together both in Netherlands and in India. Good wishes for your future and hope to play tennis again. I would like to also acknowledge all my international squad Kasper, Krzysztof, Joyce, Johanna, Peter, Eric, Orest, Tibor, Danny, Luc Wasungu Ketut Eddy, and Koen.

My heartily thanks goes to my dear Mother who gave me everything during her difficult situation. I would like to express my deepest thanks and regards to my dear sister (Lakshmi) and Ramesh mama for supporting me in every path I took. My dear brother Ravi thank you for boosting my confidence and special thanks goes to Preetha, Bharath and Shambavi.

My personal thanks goes to my loving wife Devi and my son Nithilarajan, Devi you did a tremendous input to this thesis by analyzing the sequences. You gave me more time by taking care of household stuff and our dear Nithil. Thank you for your tolerance during my short staying at home. I would like to thank my mother-in-law, Muralidharan, Mohanalakshmi and Lakshmi for their support.

I take this opportunity to thank and regards my Nariyambuttu Shivalingam family members: Indra attai, Kandaswamy, Sundharamurthy, Sreedhar, Pandian and Murahari for supporting us at the right time at critical situation. Gnannam mama and Shankar mama thanks for all the things you did for us. Special thanks goes to Shankar mama, Preethi, Tamilarasi Doraiswamy and her collegues (Erode) and Umamaheshwaran for translating my thesis summary to Tamil.
