Acknowledgements

I could easily write another chapter thanking all the people who have made not only this thesis possible but also my stay in Groningen such a great experience.

First, I would like to thank Xander, Paul and Stuart. It has been a great pleasure to work with all of you. Xander, I have enjoyed our meetings very much, especially the way you motivate me to pursue ideas by myself. In the last period of the thesis when I sometimes felt lost you always had a few words (but very valuable) to support and encourage me to continue working. Paul, above all I appreciate the great care and detail in which you have followed my thesis. The patience you had in correcting all kind of draft versions I gave you has been more than valuable. Stuart, when I came here I was very excited of having the possibility to work with the *guru* on PNe. It has been a valuable and rewarding experience. Thanks for the kindness with which you always treated me and for being available at anytime to answer the billions of questions and resolve the doubts I always had.

I would like to express my gratitude to Mike Barlow, Rens Waters and Thijs van der Hulst, members of my reading committee, whose insightful comments and suggestions have improved this thesis.

Chapter 5 of this thesis is the result of a collaboration with Paola Marigo. Thanks Paola for your enthusiasm and hard work on the project, and for teaching me the ins and outs of nuclear burning. During this collaboration I had the opportunity to visit in three occasions the Università di Padova and, of course, taste the nice Italian food. Thanks Paola and Leo for your hospitality.

In the last year of my thesis I had the opportunity to start a collaboration with Mariano Méndez on the study of X-rays in PNe with XMM-Newton. Muchas gracias Mariano por tu entusiasmo y dedicación en el proyecto, y por hacermme sentir bienvenido a Urecht. Me alegra mucho saber que podremos trabajar juntos en una PN, y ojala que en el futuro sean más!

In the stressful and inhuman last stages of the thesis I received invaluable help from many people. This help has come in the form of an answer to a last minute question, a plot, a discussion, or support in my lowest hours. I would like to thank especially Marco Spaans, Emilio, Xander, Mirjam, Eline, and Juan Cami, and extend my gratitude to, Sacha Hony, Frank Molster, Leticia, Scott, Henrik and John Lattanzio.

This thesis would not have been possible without the help of the SWS team; Russ, Fred, Do and Douwe. I have annoyed them with my questions on data reduction ever since I got here. Thanks for offering me your help and for taking your time to solve my problems as promptly as possible. Special thanks for Russ, who I assisted in the Statistical Methods course from which I have learned a big deal. Thanks Douwe for introducing me for the fist
time to the SWS. And of course, I am grateful to Thijs de Graauw for building the instrument. I would like to thank Hennie, Jackie, Gineke, Greta, Engelien, Petra and Els for helping me with the amazing world of Dutch bureaucracy. I am grateful to Wim, Eite, Kor and Martin for your assistance with my computer’s problems and George for his cheerful Buenos dias señores every morning. I am grateful to SRON, NWO, LKBF and Kapteyn Institute for the financial support during my PhD research.

It is a pleasure to thank all the IRS team at Cornell University on the other side of the Atlantic, and especially Jim Houck, Don Barry, Bernhard Brandl, and Laurie McCall. I felt warmly welcomed during my visit and I am looking forward to start working with you.

Groningen has been a wonderful experience and many people are responsible for this feeling. Thank you all very much, you made my thesis to has less chapters :)

Me gustaria agradecer ante todo a Emilio y a Íñigo su amistad. Conoceros ha sido lo mejor que me ha pasado aquí. Es increíble la de cosas que nos han pasado juntos. Sin duda nuestro viaje a Ibiza fue memorable, especialmente el día de mi cumpleaños; el Emilio escuchando truenos a las 6:00 am, el diluvio que nos cayó en el coche, la tienda llena de barro, el Íñigo que pierde la sandalia y le pica una avispa, en fin... y acabamos en el karaoke cantando la bambola con subtítulos en italiano. Sabed os voy a echar de menos y que espero que me visitéis y que nuestra amistad sea para siempre. César y Lulu, vuestra amistad la aprecio muchísimo. Esas tardes matando dragones y gigantes hasta las tantas de la noche han sabido a mucho. Gracias César por esas charlas sobre furgo para amenizar el día en el curre, y por tu ayuda con el dishoso papeleo que hay que hacer para defender la tesis. Leticia, te debo el haber venido a Groningen, que no es poco, gracias. Te seguí la pista desde Canarias, pero me temo que no te podre seguir a Ginebra. Os espero a tí y a Carlos con los brazos abiertos en Cornell. A Jorge y a Isa les debo decenas de cenas. Esos peaso de cocidos y las partiditas a la marrana los recuerdo con mucho sabor.

Wat de toekomst ook mag brengen, ik weet dat jij er deel van zal zijn. Ik weet zeker dat we onze weg zullen vinden. Ik hou van jou.
