First of all, I would like to say that I had a wonderful time here in Groningen, and I would like to thank all of you who made the time so incredibly nice.

Hendrik Buikema, when I visited the Clinical Pharmacology for the first time, you were explaining me all the nice and interesting things about vessels, while standing near the full batch of organ bathes, and I felt this will all go in the right direction. And indeed it came out to be a very nice and successful time. I learned that good qualitative work is largely based on a friendly and helpful environment, on patience to let ideas develop, on going on discussing things, and on insisting in ideas once believing in them. I loved our “meetings” in the Toeter, and I definitively believe that the beers did not impair our productivity in developing new ideas on the identity of EDHF. Thank you very much for opening my eyes in many different aspects of life and research, and thank you very much for all your time that you invested to improve our research.

In the first time after my arrival in Groningen there were many people who helped me a lot and who let me feel like being home. In this respect I would like to especially thank Anton Roks, Peter-Paul van Geel, and Soesja Hu. I miss every hour of our nice thursday evenings. Anton, I will never forget that you had always time when I needed help, and that you equipped me with my first dutch bike. I hope that you and Edith will often come to visit me in Berlin. Soesja, it was so good that you motivated us to go in for sports, I had so much fun to play tennis and squash and to join “bomen” with you. And my friends here in Berlin are still profiting from your teaching lessons how to make Sushi. I wish you all the best for the future, and perhaps you will once come back to Groningen to open a big chinese store?

The time went on, many people left, and slowly Bianca Brundel and me were the “old AIOs” in our AIO room. Bianca, I very much loved being your paranimfe, it was a great honour for me. I very much enjoyed all the evenings with you when we went out for a beer, because we always have a lot of things to talk about. It is a pity that you live so far away from Berlin, so that I cannot quickly drop by when something important has to be discussed. I admire your great talent as a manager, coordinating family and work, and always having time for the important things in life.

Together with the arrival of Annemarieke in our department, something like a new era began in our AIO room, and a very nice and special atmosphere of collegiality developed. I miss our afternoon tea times very much. Annemarieke, I would like to thank you very much for helping me a lot especially in the last period of finishing this thesis. Many special thanks for the translation of my summary into this lovely dutch language.

I would like to thank very much prof. dr. D. de Zeeuw and dr. R. Henning. Dick and Rob, thank you for all the helpful discussions we had, for your constructive ideas on how to improve our research, and that you had always time for the details. I would like to express my best gratitude also to prof. dr. W.H. van Gilst, dr. R. P. E. van Dokkum, and prof. dr. G. J. Navis for the good cooperation and for the support.
Furthermore, I would also like to thank Catalin, Leo, Marijke, Ard, Kaska, Sara, Henk, Bart, Els, Peter, Eric, Menno, and Maria for the nice evenings we had in several pubs and for the very nice atmosphere in our AIO room. Kaska, I missed you a lot after you left Groningen, with all my heart I wish you all the best for the future.

Many thanks also to Azuwerus van Buiten, Marjolein Hensens, Egbert Scholtens, Bianca Meijeringh, Alex Kluppel, Jacko Duker, Mirian Wietses, Cecile Driessen, and Edith for the nice collegiality and for the great technical assistance. Wessel Sloof and Leo Deelman I would like to especially thank for all the help on the whole diversity of computer problems.

Alexandra Doeglas, Ardy Kuperus, Ellen la Bastide, and Jan van den Akker, I have to thank very, very much for helping me so often and for always having “open arms” regardless of what kind of problems emerged.

The persons who paved me the way to go to the Netherlands deserve very special attention. Prof. Martin Paul, at your department I experienced my first steps in the world of science, and I would like to thank you very much for the great support throughout the years. It seemed to be incidentally that at this time I came across dr. Yigal Pinto who knew of this interesting PhD position at the Clinical Pharmacology in Groningen - at this time an unknown city for me. Yigal, I would like to thank you very much for your contagious enthusiasm. The basic ideas of several parts of this thesis evolved from our very motivating discussions.

In the “Berlin lab” there were many other persons who were very important for me. In particular, I would like to thank Dr. Hans-Dieter Orzechowski and Dr. Martin Stula very much for inducting me into so many different aspects of lab-work and science, and for the ongoing tremendous support. I was very happy to come back in april this year to join the interesting project on endothelin receptors. I would also like to thank Frank Zollmann, Heiko Funke-Kaiser, Juliane Bremer and all the others for their help and for the nice atmosphere. Frank and Heiko, I wish you an interesting and successful time abroad, and I very much hope that we will keep in touch.

I would like to express my gratitude to the members of the reading committee prof. dr. T. J. Rabelink, and prof. dr. F. G. Russel. Dr. Reinhold Kreutz I would also like to thank very much for the successful cooperation on the MWF project and for the great support.

My time in the Netherlands wouldn’t have been so nice without the immense support from my family and friends in Berlin.

Dani, Thao und Vivi, Ihr seid meine besten Freundinnen und ich danke Euch von ganzem Herzen für Eure Unterstützung und Eure Treue.

Liebe Antje, Dir danke ich für die schöne Zeit, die wir in Groningen hatten, und ich hoffe, daß wir uns trotz der Distanz auf keinen Fall aus den Augen verlieren.

Lieber Thoanny, was Du alles für mich getan hast, kann ich niemals in ein paar Wörtern ausdrücken. Ich danke Dir aus tiefstem Herzen für Deine selbstlose Unterstützung, Deine unglaubliche Geduld und Dein grenzenloses Vertrauen. Ich freue mich so sehr auf ein weiteres Leben mit Dir an Deiner Seite.
