ACKNOWLEDGMENTS

The research has been financially supported by a number of foundations and research projects (listed according to the year in which the support was provided):

- **Civic Forum Foundation**, which provided the author with a free-of-interest loan of 2000 USD for the stay at the Groningen Voice Research Lab, University of Groningen, the Netherlands in January-July 1993

- **Jan Patočka Foundation**, which provided the author with a three-month fellowship for the stay at the Groningen Voice Research Lab in January-March 1993

- **Hlávka Foundation**, which partially financially supported the stay of the author at the Groningen Voice Research Lab in April-July 1993

- **Centre for Biomedical Technology** (later **Department of Biomedical Technology, Artificial Organs**, recently **Department of Biomedical Engineering**), which financed the stay of the author at the University of Groningen in January-April 1994 (special thanks belong to Dr. G. Rakhorst and Dr. ir. G. J. Verkerke)

- **TEMPUS JEP 1941**, a joint European program, which provided the author a six-month fellowship for the stay at the University of Groningen in April-November 1994

- **Czech Literary Fund**, which partially financially supported the author’s research stay at the Groningen Voice Research Lab in April-May 1995

- **Fulbright Commission of the Czech Republic** awarded the author a “Travel Only Grant” which enabled presentation of the research results at the Voice Foundation’s symposium in Philadelphia in June 1995

- **EUREKA Project EU 723 “Artificial Larynx”** (1996–1999); via this project it became possible to start the research at the Center for Communication Disorders, Medical Healthcom in Prague, to continue the collaboration with the University of Groningen and to widely publish the research results at international congresses and symposia

- **Project of the Grant Agency of Czech Republic GA ČR 106/98/K019 “Mathematical and Physical Modeling of Vibroacoustic Systems in Voice and Hearing Biomechanics,”** which has been financially supporting the research since 1998

Special acknowledgment is expressed to:

- **Lambert Instruments BV** company (Leutingewolde, the Netherlands) for the technical realization of the videokymographic system

- **Kay Elemetrics Corp** (Lincoln Park, NJ, USA) for the support and stimulation of further research in videokymography
Personal thanks belong to:

- **Prof. Dr. Harm K. Schutte**, director of the Groningen Voice Research Lab who invited me to come for a research stay to the Groningen Voice Research Lab in 1993 and became the supervisor of my research. He has provided me with wide opportunities for experimental research, supervised the development of videokymography, supported my stays in Groningen and significantly influenced the start of my professional career as a voice scientist.

- **Ass. Prof. Dr. František Šram**, director of the Centre for Communication Disorders, Medical Healthcom in Prague, the Czech republic, who enabled me to continue with the research in my home country. He created a laboratory in the Centre for Communication Disorders in Prague, specially suited to fit the needs of our research, and supported my efforts in every possible way. He became the first clinician who started to use videokymography in clinical practice; all the pathological images shown in this dissertation were derived from his clinical examinations.

- **Donald G. Miller**, for our long-lasting discussions in the very beginning of my stay in the Netherlands which enabled me to find out what the current state of knowledge in the field of research on singing voice is. He has contributed to the research on voice registers presented in the dissertation and has been extremely helpful with improving my knowledge of English.

- **Prof. Dr. Ronald J. Baken**, for valuable discussions and comments on my work, his personal support and guidance during my visits to the USA.

- **Ass. Prof. Dr. Josef Pešák**, my first teacher who introduced me to the scientific subject of human voice and who helped me with the research activities at the Palacký University in Olomouc, Czech Republic.

- **Hana**, my patient wife and distinguished mouse-clicker.

- many others, who directly or indirectly helped me and stimulated my efforts.
