I came to Molgen, Groningen, Netherlands for my PhD study in October 2010. After five and half years, the thesis comes out as a gift of hard working. During this period, many people have given me various helps, and I sincerely would like to say “thank you”, for all your kindesses.

Firstly and most importantly, I would like to thank my promoter Prof. Oscar P. Kuipers. Thank you for accepting me as your PhD student. You are a very good tutor, and always show me right ways, which helped me quite a lot. Your active and innovatory style in science has affected me profoundly. Moreover, your positive energy, encouragement and kind words have given me a lot of motivation; and your wisdom and flexibility have greatly widened my knowledge and vision. Furthermore, thank you for offering me the half year extension to finish the experiments and thesis. Maybe I will leave Netherlands, but your edification will be with me.

I also would like to thank Prof. Jan Kok and Prof. Jan-Willem Veening for all the suggestions and concerns; and thank Prof. Gert Moll for the thesis assessment and suggestions.

I am very grateful to my daily supervisor Auke J. van Heel, who have helped me quite a lot during these years and have spent much precious time in showing various techniques, discussions, experimental design, checking presentations and helping to revise the papers and thesis! Good luck with your new job! All my best wishes to your family!

Many thanks to my collaborators Jaap Broos and Jinfeng Shao. With your supports
