Index

α-approximation
  of a cdf, 144
  of a pdf, 144
  of a random variable, 144
approximation, see convex approximation

Berge upper semicontinuous, 40
biconjugate function, 117
bounded variation, 63
cdf (cumulative distribution function), 14
  left continuous, 76
chance constraint, 10
  integer, 10
complete
  (mixed) integer recourse, 35
  recourse, 13
  recourse matrix, 13
complete local minimizing (CLM) set, 40
compound approximations, 161
computational complexity, 126
conjugate function, 117
convex approximation, 5, 113, 116, 143
convex hull
  of a function, 116
  of a set, 116
cumulative distribution function (cdf), 14
decision rule, 10
degree of non-convexity, 158
deterministic constraints, 12
distribution problem, 10
dynamic programming, 44
empirical distribution, 41
epigraph, 116
error bound, 147
expected recourse cost, 11
expected shortage function, 20, 24
  integer, 48
α-approximation, 154
expected surplus function, 20, 23
  integer, 48
α-approximation, 146
expected value function, 12
  integer
    α-approximation, 162
    convex hull, 134
one-dimensional, 20, 26
  integer, 48, 86
  integer, α-approximation, 155
  integer, convex approximation, 113
  integer, convex hull, 119
feasibility cut, 42
feasible region, 12
first-stage
  decision, 11
  variables, 11
fixed recourse, 12
fixed technology matrix, 20
Graham scan, 121
heuristics, 44
hierarchical decision problem, 44
indicator function, 90, 137
induced constraints, 12
integer L-shaped method, 41
integer programming, 1, 2
integer recourse, 2, 11, 45
integer-valued random variable, 54
knot, 22
L-shaped method, 41
linear programming, 1, 7
Lipschitz continuous, 16, 24–26, 38, 61, 89
lower semicontinuous, 37, 60, 82, 88
hull, 117
mathematical programming, 7
mixed integer recourse, 35
modeling, 7, 9
non-linear optimization, 13
NP-hard, 2
null space, 136
objective function, 1, 11
optimality cut, 42, 43
pdf (probability density function), 38
penalty function, 1
probability density function (pdf), 38
left continuous version, 66
right continuous version, 66
proper function, 135
r-convex distribution, 38
random recourse, 12
random technology matrix, 27, 95
range, 136
reasonable convex approximation, 113
recourse, 2, 11
actions, 2
cost, 10
matrix, 13
relatively complete recourse, 13
reliability coefficient, 10
rounding with respect to $\alpha + Z$, 144
second-stage problem, 2
semi-periodic, 59
sensitivity analysis, 8
separable, 18, 136
simple
continuous recourse, 20
integer recourse, 45
recourse, 13, 18
recourse matrix, 18
SLP-IOR, 140
stability, 39
stochastic linear programming, 1
support, 14
tender variable, 20
total
decrease, 63
increase, 63
variation, 63
two-stage model, 11
uniform error bound, 149
valid set of cuts, 43
value function, 11
mixed integer, 36
simple recourse, 19
integer, 47
wait-and-see model, 10
weak convergence, 39
weak covariance condition, 15
