# **Intramolecular Triplet-State Quenching as a General Method for Photostabilization**

Jasper H. M. van der Velde

Cover design: J.B. van der Velde & J.H.M. van der Velde  
Printed by: GVO drukkers & vormgevers B.V.

Zernike Institute PhD thesis series 2016-20

ISSN: 1570-1530  
ISBN: 978-90-367-8964-6 (printed version)  
ISBN: 978-90-367-8963-9 (electronic version)

The research described in this thesis was carried out in the Zernike Institute of Advanced Materials of the University of Groningen, the Netherlands, and financially supported by the Ubbo Emmius funding (University of Groningen) and the Zernike Institute for Advanced Materials and the Centre for Synthetic Biology (University of Groningen, start-up grant to dr. T. Cordes).

# Intramolecular Triplet-State Quenching as a General Method for Photostabilization

## Proefschrift

ter verkrijging van de graad van doctor aan de  
Rijksuniversiteit Groningen  
op gezag van de  
rector magnificus prof. dr. E. Sterken  
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

vrijdag 24 juni 2016 om 16.15 uur

door

**Jasper Hendrik Martinus van der Velde**

geboren op 24 september 1988  
te Arnhem

**Promotor**

Prof. dr. A.M. van Oijen

**Copromotor**

Dr. T. Cordes

**Beoordelingscommissie**

Prof. dr. P. Tinnefeld

Prof. dr. W.R. Browne

Prof. dr. W.H. Roos

# Contents

|   |           |
|---|-----------|
| <b>1 Introduction</b>   | <b>7</b>  |
| Introduction  | 8         |
| Fluorescent labels  | 8         |
| Intrinsic signal fluctuations and photobleaching of organic fluorophores  | 10        |
| Removal of oxygen   | 12        |
| Triplet-state quenchers as solution additives and a reducing oxidizing system (ROXS)                              | 13        |
| Intramolecular photostabilization: "self-healing"   | 17        |
| Thesis Outline  | 19        |
| References  | 21        |
| <b>2 Mechanism of Intramolecular Photostabilization in Self-Healing Cyanine Fluorophores</b>                      | <b>29</b> |
| Introduction  | 30        |
| Results and Discussion  | 31        |
| Photophysics of Cy5 on the Single-Molecule Level  | 31        |
| Self-Healing in Cy5-Based Fluorophores  | 34        |
| Solution-Based Healing <i>versus</i> Self-Healing   | 36        |
| Conclusions and Outlook   | 38        |
| Materials and Methods   | 40        |
| References  | 45        |
| <b>3 The Power of Two: Covalent Coupling of Photostabilizers for Fluorescence Applications</b>                    | <b>51</b> |
| Introduction  | 52        |
| Results and Discussion  | 53        |
| Combined photostabilizer for intermolecular photostabilization  | 53        |
| Combined photostabilizer for intramolecular photostabilization  | 56        |
| Conclusion  | 59        |
