Novel Applications of Tetrazoles Derived from the TMSN₃-Ugi Reaction

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. E. Sterken
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

maandag 27 juni 2016 om 12.45 uur

door

Ting Zhao

geboren op 27 januari 1984
te Gansu, China

Promotor

Prof. dr. A.S.S. Dömling

Beoordelingscommissie

Prof. dr. A.K.H. Hirsch

Prof. dr. C. Hulme

Prof. dr. K.U. Loos

於鑠王師，遵養時晦。

時純熙矣，是用大介。

我龍受之，躋躋王之造。

載用有嗣，實維爾公允師。

----- 詩經•周頌•酌

**Dedicated to my beloved family and my lovely baby,
Duanduan.**

Contents

Chapter 1

General introduction and scope of this thesis	1
1.1 Drug discovery	2
1.2 Bioisosterism	3
1.3 Carboxylic acid as a key determinant in drug-target interactions.....	3
1.4 Tetrazole as a nonclassical bioisostere of carboxylic acid.....	4
1.5 Aim and scope of this thesis	6
1.6 References.....	7

Chapter 2

Review: tetrazoles via multicomponent reaction routes	9
2.1 Introduction.....	10
2.1.1 Structural biology of tetrazoles.....	14
2.1.2 Tetrazoles may participate in up to 4 hydrogen bonds with their four nitrogen σ -lone pairs	18
2.1.3 The tetrazole moiety is an efficient metal chelator similar to carboxylate ...	19
2.1.4 The tetrazolyl unit is forming an Arg-sandwich	20
2.2 Tetrazoles through non-multicomponent reaction synthetic routes	23
2.3 Multicomponent reaction for the synthesis of tetrazoles	25
2.3.1 Monocyclic tetrazole derivatives	25
2.3.2 Bicyclic tetrazole derivatives	83
2.3.3 Tricyclic tetrazole derivatives	89
2.4 Conclusions	96
2.5 References	96

Chapter 3

α-Amino acid-isosteric α-amino tetrazoles	113
3.1 Introduction.....	114
3.2 Results and discussion	116
3.3 Conclusions	126
3.4 Experimental section	130
3.4.1 Synthesis and characterization of Ugi products	130
3.4.2 Synthesis and characterization of α -amino tetrazoles	139
3.4.3 Synthesis and characterization of uncommercially available starting materials	146
3.4.4 NMR and mass spectra of products	153
3.4.5 Single crystal X-ray structure determination of compounds 5a and 5j	178
3.4.6 Single crystal X-ray structure determination of compound 5l	181
3.5 References	183

Chapter 4

Tritylamine as an ammonia surrogate in the Ugi tetrazole synthesis	187
4.1 Introduction.....	188
4.2 Results and discussion	189
4.3 Conclusions	191
4.4 Experimental section	192
4.4.1 General methods	192
4.4.2 Synthesis and characterization of <i>N</i> -trityl protected α -aminotetrazoles ...	193
4.4.3 Synthesis and characterization of <i>N</i> -deprotected α -aminotetrazoles	197
4.4.4 NMR and mass spectra of products	201
4.4.5 Single crystal X-ray structure determination of compounds 1b , 1c , 2k and 2l	211
4.5 References	225

Chapter 5

Ugi 4-CR synthesis of γ- and δ-lactams providing a new access to diverse enzyme interactions	227
5.1 Introduction	228
5.2 Results and discussion	229
5.3 Conclusions	233
5.4 Experimental section.....	233
5.4.1 General	233
5.4.2 Synthesis and characterization of compounds 5a-j and 6a-j	234
5.4.3 NMR spectra of compounds 5a-j and 6a-j	240
5.5 References	247

Chapter 6

Review: effective arginase inhibitors as promising therapeutics for the treatment of arginase induced NO deficiency related diseases.....	249
6.1 Introduction.....	250
6.2 Structures of human arginase.....	252
6.2.1 Human arginase I.....	252
6.2.2 Human arginase II.....	253
6.2.3 Catalytic mechanism of human arginase	253
6.3 The inhibitors for human arginase I and II	255
6.3.1 ABH and BEC	255
6.3.2 NOHA and nor-NOHA	259
6.3.3 α -Substituted ABH derivatives.....	260
6.3.4 Other human arginase inhibitors	267
6.4 Conclusions	271
6.5 References	272

Chapter 7

Bioisosteric replacement of carboxyl group with tetrazolyl moiety suggests a new avenue for designing human arginase inhibitors275

7.1 Introduction 276

7.2 Inhibitor design and synthesis 278

7.3 Results and discussion 282

7.4 Conclusions 287

7.5 Experimental section 287

 7.5.1 General procedure 287

 7.5.2 Chiral separation 295

 7.5.3 Optical rotation analysis 295

 7.5.4 Enzymatic assays 295

 7.5.5 Purification and X-ray crystallization of human arginase I with ATPBA.. 296

 7.5.6 Crystallization 298

7.6 References300
