RIJKSUNIVERSITEIT GRONINGEN

GLOMERULAR ADENINE NUCLEOTIDASES

**A STUDY INTO THE ANTI-THROMBOTIC AND ANTI-INFLAMMATORY
ACTIVITY OF THE RAT KIDNEY**

PROEFSCHRIFT

ter verkrijging van het doctoraat in de Geneeskunde
aan de Rijksuniversiteit Groningen
op gezag van de Rector Magnificus Dr. S.K. Kuipers
in het openbaar te verdedigen op
woensdag 29 april 1992
des namiddags te 1.15 uur precies
door

Klaas Poelstra

geboren op 3 januari 1964
te Dokkum

Promotores: Prof. Dr. M.J. Hardonk
Prof. Dr. J.J. Weening

Referent: Dr. W.W. Bakker

Promotiecommissie: Prof.Dr. J.R. Brentjens
Prof.Dr. M.R. Halie
Prof.Dr. Ph.J. Hoedemaeker

The printing of this thesis was kindly supported by contributions of the Dutch Kidney Foundation and Schering Nederland B.V..

aan Wietske en Klaas Oeds

CONTENTS

	Page
Voorwoord	3
Chapter 1 General Introduction	5
Chapter 2 Demonstration of antithrombotic activity of glomerular adenosine diphosphatase. <i>Blood 78: 141-148, 1991</i>	11
Chapter 3 Adriamycin induced decrease of ATPase activity in the glomerular basement membrane of the rat kidney is mediated by oxygen free radical species. <i>Progress in Basement Membrane Research, Renal and related Aspects in Health and Disease. M.C. Gubler & M. Sternberg (Eds). John Libbey Eurotext Ltd, London, pp. 259-264, 1988</i>	27
Chapter 4 Intraglomerular platelet aggregation and experimental glomerulonephritis. <i>Kidney International 37:1500-1508,1990</i>	35
Chapter 5 Intraglomerular thrombotic tendency and glomerular ADPase. Unilateral impairment of ADPase elicits a proaggregatory microenvironment in experimental glomerulonephritis. <i>Laboratory Investigation 64:520-526, 1991</i>	53
Chapter 6 Evidence for antithrombotic activity within the extracellular matrix of rat glomeruli. <i>Submitted</i>	67
Chapter 7 Modulation of antiThy1 nephritis in the rat by adenine nucleotides. Evidence for an anti-inflammatory role for nucleotidases. <i>Laboratory Investigation, in press</i>	83
Chapter 8 Attenuation of antiThy1 glomerulonephritis in the rat. anti-inflammatory activity of platelet inhibiting pharmaca. <i>Submitted</i>	101

Chapter 9	117
Potiation of glomerular ADPase activity by acetylsalicylic acid. <i>Submitted</i>	
Chapter 10	129
Summary and conclusions	
Chapter 11	135
