**INTRODUCTION**

**Negative Concord:** more than one negative element is allowed in order to convey a single negative concept - Serbian (1)

**Double Negation:** two negative elements cancel each other out and result in an affirmative sentence - English (2)

(1) Nećemo te više nikad ništa pitati.  
   neg.will.3rd.p.pl you.acc more never nothing ask  
(2) We don’t need *no/any help.

**Similarity:** with respect to negative adjectives and their licensing of NPIs they both yield Double Negation in constituent negation (3):

(3) a. Nesvesna "nikakvih/ikakvih opasnosti, otišla je na put.  
   unaware no-kind/any-kind.gen dangers went is on trip  
b. Unaware of *no/any dangers, she went on vacation.

**TERMINOLOGY**

NPIs are lexical units that can appear mainly in negative contexts and have to be licensed (allowed) by negative elements in a sentence.  

For Serbian there are two types of NPIs:  

- i-NPIs - long-distance licensing items:  
  - iko, išta, igde, ikad
- ni-NPIs (n-words) - clause-mate licensing items:  
  - niko, ništa, nigde, nikad

N-words are negative elements which can or cannot express negation which depends on their syntactic position.  

An expression α is an n-word iff (Giannakidou, 2002:2):  

- α can be used in structures containing sentential negation or another α-expression yielding a reading equivalent to one logical negation; and  
- α can provide a negative fragment answer.

**RESEARCH QUESTION**

How come negative adjectives cannot license ni-NPIs locally and allow a Negative Concord reading?

**METHOD**

**Research method:** questionnaire (two tasks); 40 informants (students of English language and literature in Novi Sad, native speakers of Serbian)

**Results:** more than 90% of participants disallow constructions with negative adjectives and ni-NPIs in Serbian.

**ANALYSIS**

- interpretable and uninterpretable [Neg] feature on negative heads, NPIs and negative adjectives in NC languages:
  
  Negative heads: [uNeg], [iK]<iNeg>  
  N-words: [iNeg], [uK]<uNeg> - inherently negative  
  Negative adjectives: [iNeg] - semi-negatives, carrying negation  
  i-NPIs: [uNeg] - not inherently negative but licensed by negative markers

**Problem:** Negated prepositional phrases with “split” n-words in environments with negative adjectives:  

  unprepared for no.kind/for any.kind.acc adventures, turned-down is offer
- b. Nespremna ni za kakve/“i za kakve poduhvate, odbila je ponudu.  
  unprepared no for kind/any for kind.acc adventures, turned-down is offer

“Unprepared for any adventures, she turned down the offer.”

Solid ground for further research!

**CONCLUSION**

- Contexts with negative adjectives are negative, but not Negative Concord environments.  
  They are **Double Negation environments**.

- Proposition:  
  Sentences with negative adjectives represent a DN licensing context of true NPIs (i-NPIs and any-NPIs) that allow clause-mate i-NPIs. (and in these terms they share a similarity with English).
