Curriculum vitae
About the author

The author particularly dislikes writing about himself in third person, so... I was born January 28th, 1987 in Leeuwarden. In 2006, I finished high school and moved to Groningen to study biology. There, three years later, I obtained a Bachelor’s degree in Behavioural & Cognitive Neurosciences (BCN), cum laude. My Master’s degree followed in 2011, after completing the University of Groningen’s Science, Business and Policy programme. By that time, I finally realized what I wanted most was to continue with neuroscientific research, and therefore enrolled into the BCN Research Master. At the end of the programme’s first year, I accepted a position as a Ph.D. candidate at the Department of Psychiatry at the University Medical Centre Groningen. This thesis is the result from my work there, from 2012 to 2016, under the supervision of Prof. Pieter Hoekstra and Dr. Catharina Hartman. Now, at the time of writing, I am working at the University of Oslo (UiO) on the Royal Netherlands Academy of Arts and Sciences (KNAW) Ter Meulen scholarship. After this project, in December 2016, I will commence a two-year appointment at UiO as a Scientia research fellow, investigating the genetics of neuroplasticity and how this relates to neurodevelopmental disorders, using high-dimensional genetic data and large-scale neuroimaging datasets.

Dennis van der Meer, 01-09-2016
