# Targeting the DNA damage response in cervical cancer

Hylke Wiebe Wieringa

Publication of this thesis was financially supported by:  
University of Groningen  
University Medical Center Groningen  
Graduate School of Medical Science  
Stichting Werkgroep Interne Oncologie

Front cover: merged immunofluorescence image (magnification 60x) demonstrating DNA damage 72h after cisplatin treatment (2  $\mu$ M) in a human cancer cell (BT-549). DNA double strand marker  $\gamma$ -H2AX (green) is co-stained with cyclin-B (red) en 4',6-diamidino-2-phenylindole (DAPI; blue) reflecting respectively the mitotic cell cycle phase and the nucleus.
