Chapter 7

Acknowledgements

I am glad I can have my PhD in Groningen. I like this city pretty much, which is beautiful and quiet. Most times the weather is so changeable but I enjoyed if I am indoor! Of course, living abroad is quite fresh and interesting! It was very challenging for me to balance my study and family life, but I make it with the help of my almighty God and many friendly people surrounded me!

Siewert-Jan, first of all, thanks for providing me a PhD position in MD group, which is the best group in this world! Being a PhD student of you is one of my best choices in my life. Thank you so much for all your guidance in my study. No matter how the data looks like, you always have positive and moving forward attitude, which encouraged me much. Your positive attitude toward science and life deeply affected me. There is no doubt that you work very efficiently. It is amazing that you manage your time so well. Whenever I send you a draft you always send me back within one week! Thanks so much all your help and support to my thesis. I enjoyed the time we played Pingpong together, I hope you forget it! I am grateful for you showing Annelie and Leon to the lab sometimes, I am happy to see them and their big growth! Ik dank u en wens u veel succes voor de toekomst!

Manel, thanks for being my daily supervisor. Big thanks for all your time and patience upon supervising me. You are so excellent in programming. I appreciate that you worked very late to help me in scripting, even you spent your entire weekend for the scripts I need in my projects. I learned from you how to make beautiful figures skillfully, but not social skill yet as you are very social and easygoing, wherever you are, I can hear the big laughing. You are so warmhearted and ready to help everyone in this group, no matter who and when. Thanks for all your efforts to my projects and thesis. Enjoy your life in Lisbon! Looking forward to hearing good news from you!

Alex, thanks a lot for allowing me to join your MD course when I arrived, which was my first course I joined in my PhD life. It was quite useful but something was not easy to understand, so I continued to learn in my rest PhD life. You are so knowledgeable and kind to everyone! I still remember when we were on the train back from Switzerland, I asked you many questions, you always have answers. I was so surprised that you know everything! You kindly offer beers to the group every Friday afternoon, even prepared some nonalcoholic drinks for me! Many thanks to you for all your help and talking with me!

Clement and Jaakko, although you left already, I want to say thanks for being my first officemates. I shared a lot with you guys at the beginning of my PhD life. I enjoyed the time sharing the office with you for I would be lonely if I did not talk with you

much. You two were very helpful and practical for questions, always helped me fix up crashed simulations or questions. Hope to see you guys again somewhere!

Djurre, thanks a lot for the help for soft potential project, even though it is not on my thesis. Big thanks for your help to settle down the floors of my apartment. I enjoyed the running time with you when you were in Groningen. We shared the experience as parent. I am happy to see you in Floris defense dinner. I am glad to hear you like your apartment in Germany with your family.

Helgi, thanks all the answers for my questions. Thanks being a driver for the group many times when going to Dutch conferences. I enjoyed the trip to Helsinki with you. Your hard working and productive character impressed me a lot. The Icelandic alcohol coffee you served at Christmas is amazing weird, but nice to see there is such kind of drink in this world!

Floris, thanks for many discussions about life with me. You shared a lot with me about Dutch food and culture. Thanks you cooked Dutch dinner for my parents in law when they were in Netherlands. You read numberless Dutch letters I received for me and also made calls in Dutch to help my issues. Big thanks to you for the samenvatting. You are very professional for dealing with many issues I meet, maybe I can hire you as my translator :).

Pim, thank you for your help to the first chapter of my thesis. I enjoyed the jokes you made during coffee time. You organized many group activities very well, such as group outing and group pictures. I like the sinterklaas gifts activity, from which I can really feel and understand how Dutch people celebrate this festival. You also helped me about my insurance issues couple years ago, thank you.

Peter, I felt you already joined the group many years! I am happy you become an officemate of mine. Thank you for upgrading my machine. Your skill for programming is amazing excellent. I asked you what is the secret, you told me "Practise!". Ok, I believe that, but not everyone can achieve the same skill even though spend the same time. People have different talents. Enjoy your remaining PhD life in Groningen!

Riccardo, thanks for you reminding me about my luggage when we were on the train to Ausserberg! If it were not your reminding, my luggage would be lost three years ago! I enjoyed the home made Italian cakes you brought to the lab. Congrats to you for your big paper, getting more please!

Ignacio, thanks for organizing Christmas dinner every year by offering your beautiful and spacious apartment for the whole group. I am grateful you are helpful when I

Acknowledgements

need a MD basics book! I enjoyed every talk with you for you are so gentle and kind. I wish you enjoy your life in Netherlands.

Tsjerk, thanks for being so kind and patient when I stopped by your office to ask you about the scripts or other questions. I like the way you explain things, which is super easy for me to understand. Enjoy your little boy and all the best to your career and family.

Jonathan, thanks for all the jokes during coffee time, which drove away my stress! The biscuits your wife brought are so delicious, I enjoyed so much as they are home-made, real French, and FREE to have. Glad to hear you are learning Dutch and enjoy the differences of French and Dutch. I wish you enjoy your time in Groningen.

Carsten, thanks for organizing parties for the group, even though I did not make them. I have to sacrifice my social life due to my little kids. I appreciate for your kind help of booking hotel and showing me the ways regarding the conference in Erlangen. It is so interesting to share Chinese characters with you! It is a good idea to spend weekends to learn some Chinese/Korean languages. It is so amazing to see that your Dutch language improves so fast, which makes me trust more that you are language talented!

Ilias, it is great that you took over scheduling group meeting task, which saves me a lot of time and care. Thank you for doing this for the group as I know it is not easy at all. Thanks for some discussions of Greek words. Enjoy your PhD time in Groningen.

Paulo, Sebastian and Bart, thanks for joining the coffee time even though your office is far away. Paulo, Thanks for many useful discussions of my projects. Your advice sometimes work sometimes not, haha. Bart, thanks for the questions and discussions when I give group talk. Sebastian, thanks for the information about the Marie Curie Fellowship.

I also would say thanks to Antara, Liuyang, Minmin, Fude , who joined the group last year. Your joining makes our group more international! I hope you will all enjoy the study time in Groningen.

Hilda, Bea and Anmara, I am so glad I can have you during my PhD time. Thanks so much for all your help to many issues I need direction and suggestions. You are very efficient and responsible to help me. Most times, I even do not need to stop by your office, just sent you email, you replied very fast! Dank u wel!

I would like to thank my experimental collaborators: Chris Williams and Ann Thomas. Thanks for many discussions and meetings. I learnt a lot from you about Peroxisome and Pex11 protein.

I would give thanks to all the people involved in my PhD study.

Of course, I would thank all my dear important Chinese friends in Netherlands, Wenjun Wang & Tao Zhang. You brought me and my family a lot of happiness. I am glad that you two started to build up your family. Last year you had a lovely baby girl. Thanks for a lot of time being with us, maybe in party or actives. I wish you guys have a prosperous career future and lovely family. I appreciate to Zhonghong Ma& Jiquan Wu, your kind help to take care of Esther when I was having Grace. That time was difficult for me, and you were also busy with your little baby, but you still tried your best to give your hands to us. I would also give thanks to Jin Xu as my paranymp and your time with me and my family. Many thanks to Lei Zhang who assisted me a lot to take care of my kids when my husband was away. Jinfeng Shao and other GBB Chinese students, Jiapan Guo& Chenyu Shi, other friends in Zernike. Thanks for your accompanying time!

I would thank my parents for all their continual support to my studies and my family life, especially my dear mother. You came to Netherlands a couple of times to help my family to take care of my babies. I know living here was difficult for you as you speak neither English nor Dutch. I also talked with you not much as I was running from home to office to finish my thesis. Big thanks to you.

I also would like to thank my parents-in-law, who first came to visit us for Esther's birth. It was also not easy for you to live in Netherlands, big difference in weather, less sun here than in China. My mother-in-law knitted two sweaters for Esther. My father-in-law cooked for my family. They took good care of me and my family when they were with us. I, on behalve my family, say, thank you.

Last but most importantly I would give my deep appreciation and thanks to my dear beloved husband, Kai. You helped and encouraged me numberless times to move on and fight for the good life. Your positive attitudes to life impacted me much. No words can express my thanks to you for you to take good care of our kids to let me to work! I am so happy to see both of us are more mature after we got kids than before. Your hard working in research impacts me much in my academic life. I would also give thanks to my two little daughters, who taught me how to be a mother and what is love. I learnt a lot by taking care and playing with you. I am so blessed to have you as my daughters.
