Nanostructured Gold: Applications in the Study of Drug Metabolism

PhD Thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus prof. E. Sterken
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Friday 2 June 2017 at 14:30 hours

by

Tao Yuan

born on 22 July 1986
 in Henan, China

Supervisor

Prof. R. P. H. Bischoff

Assessment Committee

Prof. H. J. Heeres

Prof. W. R. Browne

Prof. R. Kostiainen

Dedicated to my beloved family

Table of Contents

Chapter 1	1
Introduction and scope of the thesis	1
Chapter 2	6
Surface-modified electrodes in the mimicry of oxidative drug metabolism	6
2.1 Introduction	7
2.2 Metalloporphyrin-modified electrodes	9
2.3 CYP450-modified electrodes.....	12
2.3.1 Gold electrodes	12
2.3.2 Carbon-based electrodes	17
2.3.3 Other types of electrodes	19
2.4 Conclusions and perspectives	22
References.....	24
Chapter 3	31
An <i>in situ</i> surface-enhanced Raman spectroelectrochemical analysis system with hemin modified nanostructured gold surfaces	31
3.1 Introduction	32
3.2 Experimental Section.....	33
3.3 Results and Discussion	37
3.3.1 <i>In situ</i> SERS SEC system	37
3.3.2 Electrochemical characterization of the hemin modified gold electrode	38
3.3.3 SERS spectra of an MPy/hemin modified nanostructured Au electrode	39
3.3.4 <i>In situ</i> SERS spectra in the iron marker band range	43
3.3.5 Enhancement factor estimations	45
3.3.6 Suppression of SERS on gold nanostructures by metal adhesion layers	45

3.4 Conclusions.....	46
References.....	47
Chapter 4	51
Nanoporous gold: preparation and catalytic applications	51
4.1 Introduction	52
4.2 Preparation of NPG	53
4.2.1 Dealloying	53
4.2.2 Electrodeposition	54
4.3 Catalysis on NPG	57
4.3.1 Catalysis of CO oxidation.....	57
4.3.2 Catalysis for alcohol oxidation	58
4.3.3 Other catalytic reactions	59
4.3.4 Electrochemical catalysis.....	59
4.4 Mechanism of NPG catalysis	60
4.4.1 Surface defect catalysis mechanism.....	60
4.4.2 Residual element catalysis mechanism.....	62
4.5 Perspective.....	64
References.....	66
Chapter 5	73
Catalytic N-dealkylation of drug molecules on a nanoporous gold surface	73
5.1 Introduction	74
5.2 Experimental Section.....	75
5.3 Results and Discussion	77
5.3.1 Morphological Characterization of NPG	77
5.3.2 Electrochemical characterization of NPG.....	78
5.3.3 Catalytic N-dealkylation of lidocaine on NPG	79
5.3.4 Catalytic N-dealkylation of metoprolol on NPG	81
5.3.5 N-dealkylation Catalytic mechanism on NPG	83

5.4 Conclusions.....	84
Supporting information.....	85
References.....	90
Chapter 6	94
Catalytic N-dealkylation of pharmaceuticals on nanoporous gold in a continuous flow system	94
6.1 Introduction	95
6.2 Experimental Section.....	96
6.3 Results and Discussions	97
6.3.1 Continuous-flow system	97
6.3.2 Catalytic N-dealkylation of lidocaine in the continuous-flow system	98
6.3.3 Catalytic N-dealkylation of metoprolol in the continuous-flow system	100
6.3.4 Catalytic N-dealkylation of atropine in the continuous-flow system.....	101
6.4 Conclusions.....	103
Supporting information.....	104
Reference	106
Chapter 7	108
Summary and perspectives	108
Nederlandse Samenvatting.....	111
List of publications and patent	115
Acknowledgments	116
