Towards the development of antistaphylococcal immunotherapy

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on
Wednesday 21 June 2017 at 11.00 hours

by

Danny Gerardus Amatus Maria Koedijk

born on 30 September 1951

in Sneek

Supervisor

Prof. J.M. van Dijk

Co-supervisor

Dr. G. Buist

Assessment committee

Prof. C.R. Harwood

Prof. J. Kok

Prof. G.M. van Dam

Voor Riny en Albert

The research described in this thesis was largely performed in the laboratory of Molecular Bacteriology, Department of Medical Microbiology, of the University of Groningen and the University Medical Center Groningen, within the Graduate School of Medical Sciences.

Part of the research described in this thesis was funded by the Top Institute Pharma.

Publication of this thesis was supported by the Graduate School of Medical Sciences.

Contents

Chapter 1	General introduction and scope of this thesis	1
Chapter 2	Efficient production of secreted staphylococcal antigens in a non-lysing and proteolytically reduced <i>Lactococcus lactis</i> strain. <i>Published in Appl Microbiol Biotechnol. 2014, 98: 10131-41.</i>	17
Chapter 3	Versatile vector suite for the extracytoplasmic production and purification of heterologous His-tagged proteins in <i>Lactococcus lactis</i> . <i>Published in Appl Microbiol Biotechnol. 2015, 99: 9037-48.</i>	45
Chapter 4	Active immunization with an octa-valent <i>Staphylococcus aureus</i> antigen mixture in models of <i>S. aureus</i> bacteremia and skin infection in mice. <i>Published in PLoS One. 2015, 10: e0116847.</i>	73
Chapter 5	A human monoclonal antibody targeting the conserved staphylococcal antigen IsaA protects mice against <i>Staphylococcus aureus</i> bacteremia. <i>Published in Int J Med Microbiol. 2015, 305: 55-64.</i>	105
Chapter 6	Differential epitope recognition in the immunodominant staphylococcal antigen A of <i>Staphylococcus aureus</i> by IgGs from mice and men. <i>Submitted for publication</i>	133
Chapter 7	Summary and future perspectives	161
Chapter 8	Nederlandse samenvatting	169
Appendices I.	Dankwoord	177
II.	Curriculum Vitae	180
III.	List of publications	181
