Acknowledgements

Gratitude cannot be expressed in words. However, I would like to convey my sincere thanks to everyone who helped me during these four years, for both professional and personal reasons.

Firstly, I would like to express my sincere gratitude to my supervisor Prof. Alexander Dömling for providing me an opportunity to join your research group as a Ph.D. student. For your continuous support to my Ph.D. study with your guidance, time, patience, motivation, immense knowledge, and your smile, which helped me in all the time of research and writing of this thesis. Your ability to work with students is exceptional. I feel truly grateful to you for being the person you are with us in the lab and outside as well. You are very generous, kind, funny and relax person. I learned a lot from you and I have to say that, you are an inspiration for me.

You have been a fantastic supervisor providing me freedom to design and execute my own ideas in chemistry project, that guided me to grow as an independent researcher. Thanks for making me a better researcher, problem solver, and boosting my confidence on a whole other level. It has been a pleasure for me benefiting from your great work ethics, fine mind, your integrity, and knowledge. Your advice on my personal front as well as on career path have been invaluable.

I still remember the first time we met in your office. After a discussion about projects, you told me that, in these four years focus on not only professional but also on personal growth. This thing really helps me throughout these 4 years, and which was much needed for me. And that’s why in these four years very good things happen with me, like selection in Lindau Nobel laureates Meeting 2015, or getting prestigious travel grants or awards. I participated in social groups like GISA (Groningen Indian Student Association) or volunteer in UMCG conference to build-up social confidence. Also, even my magic tricks which I showed you at dinner at Charry’s apartment or in famelab and even at MCR symposium. These things really gives me the confidence in public speaking. Thank you very much for everything.

Next, I would like to thank my co-promotor, Prof. W. J. Quax. Thank you for your suggestions and guidance during the Ph.D. evaluation each year and more especially during my thesis submission. Due to your help, I am able to get my defence date even before my contract finish.

I would like to acknowledge the members of the assessment Committee, Prof. P.H. Elsinga, Prof. C. Hulme and Prof. L. El Kaim, for their time and effort invested in reading and evaluating my thesis and valuable comments and suggestions.

I would like to convey my regards to Dr. Matthew Groves, Assistant Professor at the Drug Design Group. Thank you so much for your guidance and useful advice for the caspase project. You understand every student’s problems and try to solve it on a personal level. You spend plenty of time with students to share ideas, instructions and introduce scholars to science. Thank you very much for everything!

Thanks to all collaborators of the Caspase project, Prof. Spanu, and his research group, Prof. Maria, and other all collaborators from Italy. From RUG, Prof. Elsinga, Dr. Amalia, and Prof. Gosens.

My sincere gratitude to our Lab Manager, Andre Boltjes, who was always there to help us. I really appreciate your kind and pragmatic nature. Thanks for all the support during this journey. Also translating my thesis summary in Dutch.
Appendix

Jolanda for helps me with administrative issues and information. Thank you Jolanda!

Chary, thank you very much for being as my friend and as a brother with whom I can share any good or bad moments without any hesitation. You have always been eager to discussion with an open mind. Whenever anything happens, the first thing I think of is telling you. That's the sign of an awesome friend. I got one friend who will be always there for me. Thanks for serving as a mentor to last 2 years. For sharing your ideas and expertise about research and successful experience for projects. Your understanding of problems, teaching excellence, and interpersonal skills all contributed to a successful last 2 years of my Ph.D. You are nothing but a just fabulous guy and so compassionate. Best wishes for your future!

Next, I would like to thank a person who always there to help, from computational chemistry at the beginning of my Ph.D. to the each and every aspect of thesis and defence process without vacillating at all. My co-author of my first Ph.D. paper and best friend Tryfonas! I always wonder about your helping and kind nature with everyone. I wish you an excellent future. You are the best. I'm so very glad I'm friends with you.

I like to thank my another paranymph, Santosh. For your suggestions and comments during paper writing. Discussions with you help me to see the both sides of each aspect. Thank you for always being my best supporter.

I would also like to acknowledge the European Union Erasmus program Svaagata.eu project, and providing me 3 year Ph.D. scholarship, without this, it was not possible to join Ph.D. Thank you very much to the University of Groningen for proving me last year scholarship.

Thanks to Anita Veltmaat, for being a Dutch parent for me since last four years. For your concern about every minute thing, for nice dinners at your home and for nice coffee meetings. Letting us know more about Dutch culture, cuisine and lot more. You really a great person with big heart.

Thanks to my Erasmus family, Sumit, Hemant, and Ann for sharing information and being friends since last 4 years. Thanks for Akansha and Anurag. I will always remember our first year Diwali celebration in Melkweg!

Sumit, I have lots of memories from even before coming to Netherlands. I still remember that you and Hemant came to receiving me on Groningen train station. The first year in Melkweg, our cycle trips, countless dinners and GISA events or city center visits and also Rome trip. Wish you best of luck for your Ph.D. and future.

Hemant, my another buddy, be always there for everything. Thank you very much for being there for me every time, from receiving from the train station of the first day to even for helping in booking my Ph.D. defence dinner party. Also for numerous dinners, GISA, and Czech visit. Best of luck for your future!

Thanks to my Ph.D. colleagues, Eman and former office mate Natalia, for discussions and information about credit courses, project progress and the plan for the Ph.D. thesis. Best wishes for your thesis and defense! Eman, I will always remember our long discussion about thesis plans and your homemade sweet sweets!

My Friend, research project partner & Co-Author Jingyao, it is a nice experience to work with you and I really enjoyed this opportunity. Also, I am glad to work with you on ongoing projects. My best wishes are always with you.
Indian friends from our lab, Bhupendra, Pravin, Shrinidhi, Naveen, it was a great time with you guys in Groningen. Vishwanath, Saif, and Saravanan, I will always remember our weekend parties and delicious food. Thanks for truckloads of good times.

Thanks to Dinos for lab help and being partner for memorable Lindau Nobel laureates Meeting. Thanks, Edwin and Ting for valuable suggestions and information gave me time to time. Thank you for all the good times we shared in and out of the lab.

Our lab mates and also scholars visiting from all over the world, Yuanze, Fandi, Robin, Shabnam, Silvia, Arianna, Paola, Samat, Maxx (Irish), Ariana, Evo, Michel, Leni, Ewa, Max, Fanny, Keas, Roberto I and II, Harmen, Perry, Juliana, and Erica. Thanks to our biology lab colleagues Sergey, Atliz, Fernando, Ameena and Kai.

My office mate, Qian and Markella, hope we had a nice time in office. Best wishes to both of you! Arianna, thanks for being nice talkative officemate, sharing snacks and being always volunteer for my magic tricks. Also for planning barbecue. Gita, thank you very much for tons of memories.

My students, Iris, Daniele, Luke, and Soraya. It was nice learning and fun experience with you guys. I have enjoyed every moment of teaching you, it was a fabulous experience. I hope you also feel the same. I wish best of luck for your future!

I would like to thank the people from the group of Prof. Dekker, and first-year labmates, Nick, Marilena, and Martijn. Also thanks to Hannah and Thea.

Thanks to my Marathi friends, Milind, Sneha, Amol, Pallavi, Yoshita, and Nilesh, it was a great time with you guys in Groningen.

My first-year room partners, Arthur and Peps and also neighbor Summer (Zhang), thank you guys for being starting my first year with joy and happiness.

Our GISA 2015 team, that was wonderful one year and learned a lot about organizational skills which extended my Indian friend circle. Thank you to all guys Nilesh, Jasmine, Soma, Amuly, Ketan and Ashish.

Thanks to my NIPER friends in Europe, Tushar Satav, Somnath, Suresh, Rahul, Bakhmukund, Abhijit, Uma, and Gaurav for all information and friendship. Thanks Tushar for Paris and Belgium visit and Somnath for Geneva visit.

I am grateful to my master degree supervisor from NIPER, Prof. S. Guchhait without his encouragement, I would not have opted for Ph.D. research.

Thanks to Saurab and Aishwarya for drawing such a nice painting for the thesis cover.

Last but not least, I would like to say something about my family. Dear Aaie and Nana, I am proud to say that I am also now a doctor (of course, not physician doctor), and your wish come true that both sons are doctors now. Your support and encouragements helped me in all the stages of my journey. You always kept me focused and taught to stay positive in any situation which helps me throughout these years staying far away from home in master and in Ph.D.

Thanks to my siblings, Dr. Atul, Rani and Tai and their families to continued support, also to Jyoti vahini, and cute princes Anannya. My cousin Ajit and his family. Even though I was far away from all of you, but it never feels that ways when we have chat.
Appendix

My best friend and beloved wife Sai, dear you were the best thing happened to me in my Ph.D. I appreciate your support and understanding each and every moment and making my path more feasible. You have brought a lot of happiness, good luck, and harmony in my life.

Lavakarach Bhetua Saglynna!!

Education

PhD in Drug Design - Department of Pharmacy July 2013-June 2017
University of Groningen, The Netherlands
Supervisor: Prof. Alexander Domling

Master Degree - M. Tech. (Pharm.) in Pharmaceutical Technology (Bulk Drugs) June 2010-June 2012
National Institute of Pharmaceutical Education and Research, Mohali, Punjab, India
8.38 CGPA (CGPA on ten point scale)
Supervisor: Dr. Sankar K. Guchhait

Bachelor Degree - B. Pharmacy August 2006- May 2010
University of Pune, Pune.
S.V.P.M's College of Pharmacy, Malegaon (B.K.), Tal-Baramati, Dist-Pune, Maharashtra, India
First class with 65.12%
12\textsuperscript{th} (HSC), 2006, First class with 74.67\% 10\textsuperscript{th} (SSC), 2004, Distinction with 79.86%

Publications

### Manuscripts under Review/Preparation

1. A. L. Chandgude, …, A. Dömling, MCR towards oxazinane-tetrazole synthesis, in Review.

### Patent

Potent non-covalent inhibitors of caspase-1, Patent will be file soon.

### Awards/Scholarships/Grants

1. **Erasmus Mundus PhD** scholarship from the European commission (2013-2016).

2. **PhD Scholarship** from Volkswagen Foundation, “Aging: Cellular Mechanisms and Therapeutic Opportunities, a Herrenhausen Symposium”, September 2015, Hanover, Germany.

3. **Travel grant** from Konstanz Research School Chemical Biology, University of Konstanz for the Autumn School “Chemical Biology” October 2015, Konstanz, Germany.

5. **Travel Grant** from Konstanz Research School Chemical Biology, University of Konstanz for the Autumn School “Chemical Biology” October 2015, Konstanz, Germany.

6. **The Alzheimer’s Drug Discovery Foundation (ADDF) “Young Investigator Scholarship”, 16th International Conference on Alzheimer’s Drug Discovery on October 2015, Jersey City, NJ. (did not accepted).**

7. **SCI Travel Bursary Award**, “9th RSC / SCI symposium on Proteinase Inhibitor Design” April 2015; Basel, Switzerland.

10. Qualified Graduate Aptitude Test in Engineering (GATE) 2010, in Biotechnology; and GATE 2009, in Pharmaceutical Sciences, conducted by Council for Technical Education, Govt. of India.
Conferences / Presentations

Oral presentations:

Poster presentations:

Supervision / Mentor Experience

Project Supervisor and thesis advisor to 2 master degree Students (6 and 9 months projects) and 2 bachelor students (2 and 9 months projects)
Assisted organic chemistry bachelor degree practical 2015 (3 Weeks course)

Extracurricular activities

- Participant in “Fame Lab 2017 local heat“, Groningen.
- Event manager of “Groningen Indian Student Association (GISA)”, Groningen, 2015.
- Volunteer and sessions coordinator at the “GSMS PhD Development Conference” Groningen, The Netherlands, June 2015.
- Invited speaker as young researcher in “India Event, April 2015” at University of Groningen.
- Runner up in “Play competition” (role played: Actor and director) at S.V.P.M’s College of Pharmacy, Malegaon, 2008.
