New Approaches for Flavoenzymes Applications

Cofactor-mediated immobilization & in vitro production of human
metabolites

Marzena Krzek

The research described in this thesis was carried out at the University of Groningen, in the Molecular Enzymology Group of the Groningen Biomolecular Sciences and Biotechnology Institute. The financial support was provided by the Netherlands Organisation for Scientific Research (NWO) through an excellence in chemical research (ECHO) grant (project no. 711.012.006)

New approaches for flavoenzymes applications

Cofactor-mediated immobilization & in vitro production of human metabolites

PhD thesis

to obtain the degree of PhD at the

University of Groningen

on the authority of the

Rector Magnificus Prof. E. Sterken

and in accordance with

the decision by the College of Deans.

The thesis will be defended in public on

15 September 2017 at 12:45 hours

by

Marzena Krzek

born on 22 Februari 1987

in Proszowice, Poland

Supervisors

Prof. M.W. Fraaije

Prof. R.P.H. Bischoff

Assessment committee

Prof. W. J. H van Berkel

Prof. D.B. Janssen

Prof. G. Maglia

To explorers

THESIS CONTENT

- Chapter 1 Introduction
- Chapter 2 Covalent immobilization of a flavoprotein monooxygenase
via its flavin cofactor
- Chapter 3 Synthesis of a novel flavin cofactor analogue, N⁶-(butyl-2-
en-4-amine)-FAD for enzymes immobilization
- Chapter 4 Review on human FMO3: topology and recombinant
production in *Escherichia coli*
- Chapter 5 Microbial flavoproteins monooxygenases as mimics of
mammalian flavin-containing monooxygenases for the
enantioselective preparation of drug metabolites
- Chapter 6 Summary
- Chapter 7 Acknowledgments
