# **Potential targets for immunotherapy and infection imaging on the cell surface of *Staphylococcus aureus***

**PhD thesis**

to obtain the degree of PhD at the  
 University of Groningen  
 on the authority of the  
 Rector Magnificus Prof. E. Sterken  
 and in accordance with  
 the decision of the College of Deans.

This thesis will be defended in public on

Wednesday 13 September 2017 at 14.30 hours

by

**Francisco Romero Pastrana**

born on 12 December 1973  
 in Puebla, Mexico

**Supervisor**

Prof. J.M. van Dijk

**Co-supervisor**

Dr. G. Buist

**Assessment Committee**

Prof. B. Kahl

Prof. J. Kok

Prof. H.C. van der Mei

Dedicado a Alicia, Emilia y Elías

The research described in this thesis was largely performed in the laboratory of Molecular Bacteriology, Department of Medical Microbiology, of the University of Groningen and the University Medical Center Groningen, within the Graduate School of Medical Sciences.

Part of the research described in this thesis was funded by the Top Institute Pharma.

The author received a scholarship from Consejo Nacional de Ciencia y Tecnología (CONACyT, México)

Publication of this thesis was supported by the Graduate School of Medical Sciences.

## Table of Contents

<b>Chapter 1:</b>	General Introduction and Scope	1
<b>Chapter 2:</b>	Human antibody responses against non-covalently cell wall-bound <i>Staphylococcus aureus</i> proteins	17
	<i>Submitted for publication</i>	
<b>Chapter 3:</b>	A <i>Lactococcus lactis</i> expression vector set with multiple affinity tags to facilitate isolation and direct labeling of heterologous secreted proteins	35
	<i>Submitted for publication</i>	
<b>Chapter 4:</b>	A human monoclonal antibody that specifically binds and inhibits the staphylococcal complement inhibitor protein SCIN	49
	<i>Published in Virulence, 2017</i>	
<b>Chapter 5:</b>	Differential epitope recognition in the immunodominant staphylococcal antigen A of <i>Staphylococcus aureus</i> by IgGs from mice and men	67
	<i>Accepted for publication in Scientific Reports</i>	
<b>Chapter 6:</b>	Noninvasive optical and nuclear imaging of <i>Staphylococcus</i> -specific infection with a human monoclonal antibody-based probe	87
	<i>Submitted for publication</i>	
<b>Chapter 7:</b>	General summarizing discussion	105
<b>Chapter 8:</b>	Nederlandse samenvatting	115
	Acknowledgements	121
	List of publications	123
