Advancing Science Through Pfizer –
Investigator Research Exchange

2017 ASPIRE Young Investigator Research Awards in Endocrinology

Pfizer is proud to announce the Advancing Science through Pfizer – Investigator Research Exchange (ASPIRE) 2017 Investigator Awards in Endocrine Research, a competitive, peer-reviewed grants program sponsored by Pfizer for investigators worldwide.

Mission

- To support translational and clinical research through a competitive grants program that advances medical knowledge of the fundamental mechanisms of disease, mechanisms of action of current and potential future treatments, and to improve the care of patients with endocrine disorders.
- To support promising young investigators with an interest in advancing knowledge in defined disease areas of endocrinology.

Area of Research Focus

Pfizer will support competitive grant programs which address one of the following areas:

- Morbidity and mortality in Adult Growth Hormone Deficiency or Acromegaly
- Novel strategies including Quality of Life and Patient Reported Outcomes to evaluate and treat acromegaly or Adult Growth Hormone Deficiency.
- Early diagnosis and treatment of Adult Growth Hormone Deficiency or Acromegaly
- Impact and/or needs of the patient with Growth Disorders during the pediatric and transitional years/ young adult life

Application & Selection Process

Application is open to young investigators. The ASPIRE applications will be reviewed by an independent, external review committee comprised of medical and scientific experts. Five awards will be funded in 2017, each for a total of US \$50,000/award, inclusive of overhead costs. The applicant should check applicable laws/regulations, institutional policies and industrial rules prior to the application. The applicant should also obtain approval from the applicant's institution if there is any conflict of interest by receiving a research award fund from Pfizer Inc. Applications must be received by June 2, 2017, 11:59pm Eastern Daylight Time. Notification of Awards recipients will be in August 2017.
