The nature and nurture of female receptivity
a study in *Drosophila melanogaster*

Jenke A. Gorter

Netherlands Organisation for Scientific Research

This research has been carried out in the Evolutionary Genetics, Behaviour and Development (EGDB) group at the Groningen Institute for Evolutionary Life Sciences (GELIFES) according to the requirements of the Graduate School of Science (Faculty of Science and Engineering, University of Groningen, The Netherlands).

This research was supported by a Neuroscience Research School BCN/NWO Graduate Program grant (reference 022.OO4.OO8). Financial support for the printing of this thesis was kindly provided by the University of Groningen and the Faculty of Science and Engineering.

Cover design, figures and lay-out: Jenke A. Gorter and Jean-Christophe Billeter
Printed by: Gildeprint, Enschede

The nature and nurture of female receptivity

A study in *Drosophila melanogaster*

PhD Thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Friday 23 March 2018 at 16:15 hours

by

Jenneke Anne Gorter

born on 27 February 1990
in Dordrecht

Supervisor

Prof. J.-C. Billeter

Assessment committee

Prof. B. Wertheim

Prof. A.T. Groot

Prof. T. Chapman

Table of contents

Chapter 1: General Introduction	7
Chapter 2: A method to test the effect of environmental cues on mating behaviour in <i>Drosophila melanogaster</i>	23
Chapter 3: The nutritional and hedonic value of food modulate sexual receptivity in <i>Drosophila melanogaster</i> females	39
Chapter 4: Immediate social context and early social experience differentially modulate female sexual receptivity in <i>Drosophila melanogaster</i>	59
Chapter 5: The odorant receptor <i>Or47b</i> promotes sexual receptivity in mated <i>Drosophila melanogaster</i> females	83
Chapter 6: Different genes influence virgin and mated female receptivity in <i>Drosophila melanogaster</i> : a genome wide association study	107
Chapter 7: Synthesis	137
