# Reconstructing diet, tracing mobility

Isotopic approach to social change during the transition  
from the Bronze to the Early Iron Age in Thessaly, Greece

## PhD thesis

to obtain the degree of PhD at the  
University of Groningen  
on the authority of the  
Rector Magnificus Prof. E. Sterken  
and in accordance with  
the decision by the College of Deans.

This thesis will be defended in public on

Thursday 13 September 2018 at 11:00 hours

by

**Eleni Panagiotopoulou**

born on 19 July 1976  
in Athens, Greece

**Supervisors**

Prof. S. Voutsaki

Prof. J. van der Plicht

**Co-supervisor**

Dr. A. Papathanasiou

**Assessment committee**

Prof. J.P. Crielaard

Prof. J.K. Papadopoulos

Prof. M.P. Richards

*To my family*

Groningen Institute of Archaeology, University of Groningen

ISBN: 978-94-034-0935-1 (printed book)  
978-94-034-0934-4 (e-book)

# Acknowledgements

Having reached the end of my PhD I would like to thank all the people that contributed to the successful completion of this project and for making this period a unique experience that definitely transformed me.

First of all I would like to express my gratitude to my supervisors Prof. Sofia dr. Voutsaki, Greek Archaeology, Groningen Institute of Archaeology, University of Groningen and Prof. dr. ir. Johannes van der Plicht, Centre for Isotope Research (CIO), Faculty of Science and Engineering Isotope Research – Energy and Sustainability Research Institute Groningen, University of Groningen and co-supervisor Dr. Anastasia Papathanasiou, Ephorate of Paleoanthropology and Speleology, Greek Ministry of Culture for believing in me and for their support during the entire period of this research project. Their academic influence was immense and I learned so much as their student.

I would also like to deeply thank the three external examiners Prof. dr. J.P. Crielaard, Faculty of Humanities, Vrije Universiteit Amsterdam, Prof. J.K. Papadopoulos, Department of Classics, Cotsen Institute of Archaeology, UCLA and Prof. M.P. Richards, Department of Archaeology, Simon Fraser University for reading my work, for giving me very constructive comments that improved my thesis and for coming to the ceremony of my PhD defence.

Of course, I would like to thank all the people that I had the pleasure to meet, work with and co-author the articles of this thesis.

I will start with the archaeologists that honoured me with their trust working on the archaeological material they excavated and the corresponding archaeological ephorates that granted me access to the excavated assemblages to conduct my research: Dr. A. Doulgeri-Intzesiloglou, Director Emerita of the Ephorate of Antiquities of Magnesia and excavator and researcher of the site of Chloe; Mrs. P. Arachoviti, Archaeologist of the Ephorate of Antiquities of Magnesia and excavator and researcher of the site of Chloe; Dr. S. Katakouta, Archaeologist of the Ephorate of Antiquities of Larisa and the excavator and researcher of the site of Pharsala; Mrs. F. Tsiouka, Archaeologist of the Ephorate of Antiquities of Karditsa and researcher of the site of Voulokaliva; and Mrs. E. Nikolaou, Archaeologist of the Ephorate of Antiquities of Magnesia and excavator and researcher of the site of Kefhalosi.

I will continue with the lab people that accepted my request to work in the laboratories and conduct all the isotope analyses myself, taught me a lot, helped to go through the lab requirements, and created a very friendly and happy atmosphere to work in: Dr. J. Montgomery, Associate Professor (Reader) in Archaeological Science at the Department of Archaeology, Durham University; Dr. G.M. Nowell, Senior Research Officer in the Department of Earth Sciences at Durham University; Ms. J. Peterkin, Research Laboratory Technician at the Department of Earth Sciences at Durham University; everyone at the laboratory of the CIO, Faculty of Science and Engineering Isotope Research – Energy and Sustainability Research Institute Groningen for the friendly environment but special thanks to Mr. F.N. Ghebru, Analyst at the CIO with whom I closely collaborated; Dr. O. Nehlich, post-doctoral fellow (Stipend of the German Science Foundation - DFG) at The University of British Columbia - Department of Anthropology, at the time I visited the laboratory; and Ms. E. Jarvis, Laboratory Technician at the University of British Columbia - Department of Anthropology, also at the time I visited the laboratory.

Many thanks to all the people at the Groningen Institute of Archaeology, both academic and non-academic staff because I learned from them so much more outside my own research field, they helped me to resolve simple everyday difficulties and they introduced me to their wonderful country, the Netherlands. Furthermore, I would like to thank my peers at the department for the influential conversations we had both on academic and non-academic topics.

Special gratitude to my academic roommates Tamara M. Dijkstra, Olivia A. Jones, Dr. Tanja van Loon and Dr. Sarah Willemsen for their warm and open heart and moral and academic support as well as for becoming lifetime friends.

Of course I want to express separately my deep gratitude to Tamara M. Dijkstra and Olivia A. Jones for

accepting the role of paranymph at my PhD defence, for improving my thesis with their clear view and comments and for organizing the defence party.

Last but not least I would like to say to my family and friends in Greece thank you for your moral support and for being patient with the difficulties that my absence might have caused to you. A significant part of my future is dedicated to you.

## PART I

1.1 Summary .....	11
Samenvatting .....	13
Περίληψη .....	15
1.2 Scope and Aims .....	17
1.3 The Late Bronze Age and the Early Iron Age.....	18
1.3.1 The End of Late Bronze Age.....	18
1.3.2 The Early Iron Age (EIA).....	19
1.3.3 Thessaly in the Early Iron Age.....	20
1.3.4 Mortuary practices in Protogeometric Thessaly (c. 1100-900 BC).....	21
1.4 Questions and Theories.....	25
1.5 Methodology.....	26
1.5.1 Contextual analysis of mortuary practices .....	26
1.5.2 Isotope analysis.....	26
Tissue.....	27
Stable carbon, nitrogen, and sulfur isotope analysis (CNS).....	27
Strontium isotope analysis.....	32
1.5.3 Sampling osteological material.....	34
i. Carbon, nitrogen, and sulfur isotope analysis (CNS).....	34
ii. Strontium isotope analysis.....	34
1.6 Contextual analysis of the mortuary practices of Voulokaliva and Kephalsi in Halos, Chloe, and Pharsala .....	35
i. Quality of documentation .....	35
ii. Assumptions underlying the contextual analysis of mortuary practices .....	35
1.6.1 The Protogeometric cemeteries of Halos: Voulokaliva and Kephalsi.....	37
The cemetery of Voulokaliva .....	37
The Cemetery of Kephalsi .....	39
Discussion .....	41
Discussion of Main Patterns .....	43
Research Questions concerning Halos .....	43
1.6.2 The Protogeometric cemetery of Chloe .....	43
Discussion .....	45
Discussion of main patterns .....	46
Research questions concerning Chloe .....	46
1.6.3 The Protogeometric cemeteries of Pharsala .....	46
Site 1-“cemetery”/“tumulus” .....	47
Site 2 .....	48
Discussion .....	49
Discussion of main patterns .....	51
Research questions concerning Pharsala .....	52
1.7 Main Patterns of the Sites.....	52
1.8 Conclusions, Questions, and Hypotheses .....	52
1.8.1 Variation and differentiation .....	52
1.8.2 Change and continuity.....	53

## PART II

Introduction.....	57
Chapter 2 Isotopic ( <sup>13</sup> C, <sup>15</sup> N) investigation of diet and social structure in Early Iron Age Halos, Greece .....	59
2.1. Introduction.....	59
2.2. Materials and methods .....	61
2.2.1 Materials.....	61
i. The Protogeometric cemetery of Kephalsi .....	61
ii. The Protogeometric cemetery of Voulokaliva .....	61
2.2.2. Methods .....	62
i. Age-sex determination .....	62
ii. Contextual analysis .....	62
iii. Sampling strategy for diet reconstruction .....	62
iv. Isotope analysis.....	62
2.3. Results .....	64
2.3.1. Collagen preservation .....	64
2.3.2. Demographic profile and contextual analysis .....	64
2.3.3. Carbon and nitrogen isotope analysis.....	66
2.4. Discussion.....	68
2.5. Conclusions .....	71
Chapter 3 Diet and social divisions in protohistoric Greece: integrating analyses of stable isotopes and mortuary practices .....	73
3.1. Introduction.....	73
3.2. Materials and Methods .....	75
3.2.1. Materials.....	75
i. The cemeteries of Pharsala .....	75
ii. The cemetery of Chloe .....	75
iii. The human osteological assemblage .....	75
3.2.2. Methods .....	75
i. Osteological analysis .....	75
ii. Contextual analysis.....	75
iii. Sampling design .....	76
iv. Isotope analysis.....	76
3.3. Results and Discussion .....	76
3.3.1. Demographic profile .....	76
3.3.2. Contextual analysis of the mortuary data.....	77
3.3.3 Sampling.....	80
3.4. Isotope analysis.....	82
3.5. Conclusions .....	87
Chapter 4 Fish consumption in Early Iron Age Greece? Sulfur stable isotope analysis of human populations .....	89
4.1. Introduction.....	89
4.1.1. Archaeological, archaeozoological, and isotopic evidence of fish consumption in Greece .....	90

4.1.2. Sulfur isotope ratios in mammalian collagen.....	91	5.7.1. Chloe.....	108
4.2. Material and methods.....	92	5.7.2. Voulokaliva.....	109
4.2.1. Materials.....	92	5.7.3. Pharsala.....	110
i. Voulokaliva.....	92	5.8. Population movements in the Early Iron Age.....	111
ii. Kephalsi.....	92	5.9. Conclusions.....	112
iii. Pharsala.....	92		
iv. Chloe.....	93	PART III	
4.2.2. Methods.....	93	Chapter 6	
4.3. Results and Discussion.....	93	Discussion & Conclusions.....	117
4.4. Conclusions.....	97	6.1 Discussion.....	117
Chapter 5		6.1.1 Social Variation and Differentiation.....	118
Detecting mobility in Early Iron Age Thessaly by strontium isotope analysis.....	99	6.1.2 Change and Continuity.....	122
5.1. Introduction.....	100	6.2. Conclusions.....	123
5.2. Archaeological context.....	101	Chapter 7	
5.3. Variation in burial practices.....	101	Appendices.....	127
5.4. The environmental context of Greece and Thessaly.....	102	7.1 Appendix 1: Maps.....	127
5.5. Materials and method.....	103	7.2 Appendix 2: Excavation Plans.....	131
5.5.1. Enamel and environmental samples.....	103	7.3 Appendix 3: Charts.....	133
5.5.2. Strontium isotope analysis.....	105	7.4 Appendix 4: Tables.....	138
5.6. Laboratory procedure.....	105	7.5 Appendix 5: Isotopic Plots.....	149
5.7. Strontium isotope results.....	108	References.....	151
