Clinical and Laboratory Evaluation of Immediate Dentin Sealing

Carline van den Breemer

The studies of this thesis were conducted at:

- The Kolff / BMSA institute (Institute for Biomedical engineering, Material Sciences and Application, University Medical Center Groningen, University of Groningen, The Netherlands.
- Department of Fixed and Removable Prosthodontics, Center for Dentistry and Oral Hygiene of the University Medical Center Groningen, University of Groningen, The Netherlands.
- The Division of Dental Material Science, University of Zürich, Switzerland.
- Department of Oral Health Sciences, BioMAT & University Hospitals Leuven, Belgium.

Beschrijving voorkant

De behandeling zoals beschreven in hoofdstuk 8 is vastgelegd in een casus uitgevoerd op mijn eigen kies en dit is deels te zien in de afbeelding bij elk hoofdstuk. Op de voorkant van dit proefschrift is de Immediate dentin Sealing (IDS) laag die het dentine bedekt en mooi aansluit op het glazuur te zien. Dit is vastgelegd door een elektronen microscoop. Met dank aan M.M.M. Gresnigt en L.Z. Naves.

Clinical and Laboratory Evaluation of Immediate Dentin Sealing

Proefschrift

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen
 op gezag van de
 rector magnificus prof. dr. E. Sterken
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op
 woensdag 14 november 2018 om 16.15 uur

door

Carline Richarda Gerarda van den Breemer

geboren op 3 januari 1988
 te Soest

Contents

CHAPTER 1	11
General introduction	
CHAPTER 2	19
Cementation of glass-ceramic posterior restorations: a systematic review	
CHAPTER 3	47
Adhesion of resin cement to dentin: effects of adhesive promoters, Immediate Dentin Sealing and surface conditioning	
CHAPTER 4	65
Effect of Immediate Dentin Sealing and surface conditioning on the micro-tensile bond strength of resin-based composite to dentin	
CHAPTER 5	81
Effect of Immediate Dentin Sealing on the fracture strength of lithium disilicate and multiphase resin composite inlay restorations	
CHAPTER 6	99
Randomized clinical trial on the survival of lithium disilicate posterior partial crowns bonded using Immediate and Delayed Dentin sealing: short-term results on tooth sensitivity and patient satisfaction	
CHAPTER 7	117
Randomized clinical trial on the survival of lithium disilicate posterior partial restorations bonded using Immediate or Delayed Dentin Sealing after 3 years of function	
CHAPTER 8	139
Clinical evaluation of posterior glass-ceramic partial restorations luted using photo-polymerized resin composite in conjunction with Immediate Dentin Sealing	
CHAPTER 9	161
General discussion, future perspectives and conclusions	
Summary	173
Nederlandse samenvatting	181
Appendix	189
Dankwoord	199
Curriculum Vitae	205
