# Genotyping and phenotyping epilepsies of childhood

## Proefschrift

ter verkrijging van de graad van doctor aan de  
 Rijksuniversiteit Groningen  
 op gezag van de  
 rector magnificus prof. dr. E. Sterken  
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 05 december 2018 om 14.30 uur

door

**Danique Rienke Maria Vlaskamp**

geboren op 15 mei 1991  
 te Raalte

**Promotores**

Prof. dr. C.M.A. van Ravenswaaij-Arts

Prof. dr. O.F. Brouwer

**Copromotores**

Dr. P.M.C. Callenbach

Dr. P. Rump

**Beoordelingscommissie**

Prof. dr. V.V.A.M. Knoers

Prof. dr. H.P.H. Kremer

Prof. dr. K.P.J. Braun

## COVER

The tree on the cover of this thesis symbolizes the relationship between the genotype and the phenotype of epilepsies of childhood.

The beautiful tree has deeply anchored, widely spreading roots (genotype) that grow a new flowering tree with a unique pattern of branches, leaves and blossoms (phenotype).

*Painted by Christien Rondaan*

**Paranimfen**

# CONTENTS

<b>Chapter 1</b>	Introduction	9
<b>PART I - THE YIELD OF GENETIC TESTING</b>		
<b>Chapter 2</b>	Copy number variation in a hospital-based cohort of children with epilepsy <i>Published as: Epilepsia Open. 2017; 2: 244–254.</i>	27
<b>Chapter 3</b>	Empowerment and anxiety of patients and parents during genetic counseling for epilepsy <i>Manuscript ready to submit</i>	49
<b>PART II - GENOTYPE-PHENOTYPE STUDIES</b>		
<b>Chapter 4</b>	<i>SYNGAP1</i> encephalopathy: a distinctive generalized developmental and epileptic encephalopathy <i>Accepted for publication in Neurology</i>	71
<b>Chapter 5</b>	Genotype-phenotype correlation of 248 individuals with <i>GRIN2A</i> -related disorders identifies two distinct phenotypic subgroups associated with different classes of variants, protein domains and functional consequences <i>Accepted for publication in Brain</i>	95
<b>Chapter 6</b>	Schizophrenia is a later-onset feature of <i>PCDH19</i> Girls Clustering Epilepsy <i>Revised version under review</i>	123
<b>Chapter 7</b>	Haploinsufficiency of the <i>STX1B</i> gene is associated with myoclonic astatic epilepsy <i>Published as: European Journal of Paediatric Neurology. 2016; 20: 489-492</i>	145
<b>Chapter 8</b>	<i>PRRT2</i> -related phenotypes in patients with a 16p11.2 deletion <i>Published as: European Journal of Medical Genetics. 2018, in press.</i>	157
<b>Chapter 9</b>	Positive effect of sodium channel blocking anti-epileptic drugs on neonatal infantile epilepsy due to a <i>SCN2A</i> mutation <i>Translated from the Dutch paper published as: Epilepsie. 2017; Periodiek voor Professionals 15, nr.3</i>	177
<b>Chapter 10</b>	General discussion and a proposal for a diagnostic algorithm for genetic testing for epilepsy	185
<b>Chapter 11</b>	Nederlandse samenvatting	201
<b>Dankwoord</b>		208
<b>Curriculum vitae</b>		213
