TABLE OF CONTENTS

Chapter 1	Introduction	7
PART I – ANEMIA AND ERYTHROPOIETIN		
Chapter 2	Anemia in heart failure: still relevant? <i>JACC Heart Failure 2018</i>	19
Chapter 3	Erythropoietin in the general population: reference ranges and clinical, biochemical and genetic correlates <i>PLoS One 2015</i>	37
Chapter 4	High serum erythropoietin levels are related to heart failure development in subjects from the general population with albuminuria: data from PREVEND <i>European Journal of Heart Failure 2016</i>	71
Chapter 5	Hyporesponsiveness to darbepoetin alfa in patients with heart failure and anemia in the RED-HF study (Reduction of Events by Darbepoetin Alfa in Heart Failure): clinical and prognostic associations <i>Circulation Heart Failure 2018</i>	93
PART II – IRON		
Chapter 6	Definition of iron deficiency based on the gold standard of bone marrow iron staining in heart failure patients <i>Circulation Heart Failure 2018</i>	113
Chapter 7	Low iron storage versus defective iron utilisation in heart failure: differences in clinical profile and outcome <i>Under revision</i>	137
Chapter 8	Iron deficiency impairs contractility of human cardiomyocytes through decreased mitochondrial function <i>European Journal of Heart Failure 2018</i>	165
Chapter 9	Genetically determined low ferritin and iron levels are causally linked to coronary artery disease <i>Submitted</i>	195
Chapter 10	Discussion and future perspectives	203
Appendices	Dutch summary	221
	Publications list	226
	Dankwoord	229
