TABLE OF CONTENTS

1.	Introduction	7
2.	Estimation of total kidney volume in autosomal dominant polycystic kidney disease	21
3.	T1 vs. T2 weighted magnetic resonance imaging to assess total kidney volume in patients with autosomal dominant polycystic kidney disease	47
4.	Urinary biomarkers to identify ADPKD patients with a high likelihood of disease progression	69
5.	Urinary biomarkers to select patients with rapidly progressive autosomal dominant polycystic kidney disease	99
6.	Kidney Function Reserve Capacity in early and later stage autosomal dominant polycystic kidney disease	127
7.	Association of plasma somatostatin with disease severity and progression in patients with autosomal dominant polycystic kidney disease	161
8.	Somatostatin in renal physiology and the place of somatostatin analogues in autosomal dominant polycystic kidney disease	183
9.	Effect of a somatostatin analogue on the vasopressin pathway in patients with autosomal dominant polycystic kidney disease	207
10.	Recommendations for the use of tolvaptan in ADPKD: a proposal to update the ERA-EDTA decision algorithm	225
11.	General discussion and future perspectives	247
	Nederlandse samenvatting	265
	Dankwoord	277
	List of publications	289
