Quantitative Cardiac Dual Source CT; from Morphology to Function

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. dr. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 4 September 2019 at 11.00 hours

by

Marly van Assen

born on 18 October 1989
in Gouda

Supervisors

Prof. M. Oudkerk

Prof. R. Vliegenthart

Co-supervisor

Prof. U.J. Schoepf

Assessment Committee

Prof. G.J. Verkerke

Prof. H.J. Lamb

Prof. T. Leiner

TABLE OF CONTENTS

1.	Introduction	8
Part I	Coronary plaque and vessel wall analysis	20
2.	Machine Learning in Cardiac CT: Basic Concepts and Contemporary Data	22
3.	Deep Learning-based Automated CT Coronary Artery Calcium Scoring	50
4.	Automated Plaque Analysis for the Prognostication of Major Adverse Cardiac Events	64
Part II	Coronary flow analysis	92
5.	CT-FFR profiles in patients without coronary artery disease; the effect of location and luminal area	94
6.	Relationship between coronary CT angiography-derived fractional flow reserve and dynamic CT myocardial perfusion imaging in patients with coronary artery disease	110
7.	Prognostic Value of CT Myocardial Perfusion Imaging and CT-derived Fractional Flow Reserve for Major Adverse Cardiac Events in Patients with Coronary Artery Disease	128
Part III	Myocardial perfusion analysis	150
8.	Dynamic Myocardial CT Perfusion Imaging	152
9.	Low CT temporal sampling rates result in a substantial underestimation of myocardial blood flow measurements	184

10.	Intermodel Disagreement of Myocardial Blood Flow Estimation from Dynamic CT Perfusion Imaging	202
11.	The Feasibility, Tolerability, Safety, and Accuracy of Low-Radiation Dynamic CT Myocardial Perfusion Imaging with Regadenoson Compared to Single-Photon Emission CT	220
Part IV Functional Myocardial fibrosis analysis		242
12.	Iodine Quantification Based on Rest / Stress Perfusion Dual Energy CT to Differentiate Ischemic, Infarcted and Normal Myocardium	244
13.	Feasibility of Extracellular Volume Quantification using Dual-energy CT	264
Part V General discussion and summary		278
14.	General discussion	280
	English summary	298
	Nederlandse samenvatting	304
Part VI Appendices		312
	Acknowledgements	314
	Author Affiliations	320
	Publications	330
	Curriculum Vitae	340
