Essays on the U.S. financial cycle: construction, real effects and cross- border spill-overs

Phd thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 26 August 2019 at 12.45 hours

by

Kristiāna Rozīte

born on 13 March 1982
in Valmiera, Letland

Supervisor

Prof. D.J. Bezemer

Assessment Committee

Prof. S.J. Koopman

Prof. R.C. Inklaar

Prof. H. Bo

My humble acknowledgments to my family, friends and the teachers I met. I would like to thank my supervisor Prof. Dirk Bezemer for the research freedom to select topics and methods to present my take on the U.S. financial cycle. I thank my co-author Jan Jacobs for believing in my research skills and contributing to the broader research exposure. I am grateful to the reading committee, Prof. S.J. Koopman, Prof. R.C. Inklaar, and Prof. H. Bo for the time they invested to read this thesis and suggested improvements.

You truly know the nature of things when they are in constant change. The duality in nature such as life and death, good and evil is the engine of this motion. The blissful steady-state would stop the process of knowing yourself.

Contents

1	Introduction	1
1.1	Background and motivation	1
1.2	History of the US financial sector regulation	5
1.3	Outline of the thesis	8
2	Towards a financial cycle for the U.S., 1973–2014	10
2.1	Introduction	10
2.2	Literature review	12
2.2.1	Real-financial linkages and a financial cycle	12
2.2.2	Formalizing financial-real sector linkages	14
2.3	Method	15
2.4	Data	18
2.5	Results	19
2.5.1	Common movements	19
2.5.2	Household and Corporate Sentiment in the Financial Cycle	22
2.6	Comparison to other indexes	26
2.6.1	Financial conditions indexes	27
2.6.2	Economic conditions indexes	28
2.6.3	Comparison	28
2.7	Conclusion	31
	Appendix A	33
3	Manufacturing industries investment and market sentiment	39
3.1	Introduction	39
3.2	Empirical strategy	41
3.3	Data and variables	44
3.4	Results	48
3.5	Conclusion	56

Appendix B	57
4 Financial and real integration between Mexico and the United States	60
4.1 Introduction	60
4.2 Data	63
4.3 Stylized Facts	67
4.4 Model	70
4.5 Estimation strategy	72
4.6 Results	73
4.6.1 Univariate analysis	73
4.6.2 Multivariate analysis	76
4.6.3 Exploring the role of NAFTA	81
4.7 Conclusion	84
Appendix C	86
5 Summary	89
5.1 Main findings	89
5.2 Policy implications	91
5.3 Future research	92
Appendix D	94
References	97
Samenvatting (Dutch Summary)	108

List of Tables

2.1	Average dynamic correlations and correlations at long-wave periodic components, calculated in reference to periodic components of SYC_t .	21
2.2	Loadings of the first two principal components.	25
2.3	Correlations between financial condition and real condition indexes	30
2.4	Estimated turning points for the indexes in reference to the NBER business cycle turning points and comparison with the GDP growth rate cycle.	31
A.1.1	Description of the dataset	34
A.1.2	Summary statistics	36
A.2.1	Variance explained by the principal components	38
3.2.1	Parameter restrictions for different specifications and different types of control variables.	42
3.3.1	The external dependence estimates for the U.S. manufacturing industries.	46
3.4.1	Effects of investor sentiment on investment with industry fixed effects.	51
3.4.2	Effects of investor sentiment on investment with industry fixed effects and profit–sentiment interaction.	52
3.4.3	Effects of investor sentiment on investment with industry and time fixed effects.	53
3.4.4	Effects of investor sentiment on investment with industry and time fixed effects, and profit–sentiment interaction.	54
3.4.5	Effects of investor instrumented sentiment on investment and industry and time fixed effects	55
B.1.1	Manufacturing industries naming correspondence between datasets.	58
B.1.2	Summary statistics	59

4.3.1 Kendall rank correlations for Mexican and U.S. economic activity indicators.	68
4.3.2 The turning points of U.S. and Mexican indicators.	69
4.3.3 Factor analyses of indicator co-movements.	70
4.6.1 Business and financial cycle components found in univariate model estimations.	75
4.6.2 Factor loadings describing the United States' and Mexico's financial and real integration.	77
4.6.3 Decomposition of variance for the Mexican indicators (%).	81
4.6.4 Global and Mexican business cycle subsample effects on Mexican indicators.	82
4.6.5 Decomposition of variance (%) for the Mexican indicators over the subsamples.	83
C.3.1 Dickey Fuller unit root test	88
D.0.1A brief literature review	94

List of Figures

1.1	Financial accelerator	2
2.1	Standardized financial indicators	20
2.2	Phase shift and sign adjusted data of the U.S. financial indicators.	23
2.3	Scree plot of eigenvalues from principal component analysis	24
2.4	The U.S. corporate sentiment and household sentiment	25
2.5	Standardized financial and economic conditions indexes.	29
A.1.1	Dynamic correlations	37
3.3.1	U.S. investor sentiment and the spread between Eurodollar three-month deposit rates and LIBOR three-month rates.	48
4.2.1	Standardized Mexican and U.S. macroeconomic and financial indicators	65
4.6.1	U.S. and Mexican financial and business cycles.	80
