CONTENTS

8	Chapter 1 General introduction and outline of this thesis.
36	Part I - Personalizing treatment strategies
38	Chapter 2 Fecal calprotectin for monitoring response to induction therapy in patients with active inflammatory bowel disease: a systematic review and meta-analysis.
62	Chapter 3 Time-to-reach target calprotectin level and relation with first relapse in newly diagnosed patients with IBD: first results of the Fast Forward Care Prospective Registry.
90	Chapter 4 Methotrexate for maintaining remission in pediatric Crohn's patients with prior failure or intolerance to thiopurines: a multicenter cohort study.
110	Part II - Optimizing accuracy of fecal calprotectin measurements in disease monitoring

112	Chapter 5 Calprotectin instability may lead to undertreatment in children with ibd.
122	Chapter 6 Head-to-head comparison of three stool calprotectin tests for home use.
144	Part III - Profiling patients with childhood-onset primary sclerosing cholangitis
146	Chapter 7 Disease progression in paediatric- and adult-onset sclerosing cholangitis: Results from two independent Dutch registries.
170	Chapter 8 Exome sequencing in patient-parent trios reveals new candidate genes for early-onset primary sclerosing cholangitis.
196	Addendum
198	Chapter 9 General discussion and future perspectives.
228	Chapter 10 Nederlandse Samenvatting Dankwoord List of publications
