Confined Molecular Machines and Switches

Wojciech Danowski

The work described in this thesis was carried out at the Stratingh Institute for Chemistry, University of Groningen, The Netherlands.

This work was financially supported by the Netherlands Organization for Scientific Research (NWO-CW, NWO-Top Grant).

Confined Molecular Machines and Switches

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

vrijdag 27 september 2019 om 14.30 uur

door

Wojciech Danowski

born on 06 April 1990
in Białystok, Poland

Supervisors

Prof. dr. B. L. Feringa

Prof. dr. P. Rudolf

Co-supervisor

Dr. S. J. Wezenberg

Beoordelingscommissie

Prof. dr. M. Tromp

Prof. dr. R. J. M. Nolte

Prof. dr. ir. A. J. Minnaard

Table of Content

Chapter 1

Photoresponsive Porous Materials	1
1.1 Introduction	2
1.2 Photoresponsive Molecules	4
1.3 Photoresponsive Solid Porous Materials	9
1.4 Applications of Photoresponsive Solid Porous Materials.....	10
1.5 Conclusions	31
1.6 Aim and Outline of this Thesis	33
1.7 References	35

Chapter 2

Unidirectional Rotary Motion in a Metal Organic Framework	41
2.1 Introduction	42
2.2 Synthesis	43
2.3 Design, synthesis and characterization of the Motorized Metal Organic Frameworks.....	45
2.4 Photochemical and thermal isomerization in solution	51
2.5 Photochemical and thermal isomerization in the solid state	56
2.6 Conclusions	60
2.7 Acknowledgments	60
2.8 Experimental Data	60
2.9 References	72

Chapter 3

Visible Light Driven Rotation of Molecular Motor in a Dual-Function Metal Organic Framework Enabled by Energy Transfer.....	75
3.1 Introduction	76
3.2 Design, synthesis and characterisation of Motorized Metal Organic Framework	77
3.3 Energy transfer, photochemical and thermal isomerization in solution	85
3.4 Energy transfer, photochemical and thermal isomerization in solid state	89
3.5 Conclusions	91
3.6 Acknowledgments	91
3.7 Experimental Data	91
3.8 References	97

Chapter 4	
Modulation of porosity in a solid switchable aromatic framework enabled by bulk isomerization of an overcrowded alkene	101
4.1 Introduction	102
4.2 Synthesis of Porous Switchable Frameworks	103
4.3 Photochemical and thermal isomerization in solution	107
4.4 Photochemical isomerization in the solid state	109
4.5 Photomodulation of porosity and gas adsorption of the material	112
4.6 Conclusions	113
4.7 Acknowledgments	114
4.8 Experimental Data	114
4.9 References	121
Chapter 5	
Control over Surface Wettability by Surface-Immobilised 1st Generation Molecular Motors	125
5.1 Introduction	126
5.2 Synthesis	128
5.3 Photochemical and thermal isomerization in solution	130
5.4 Surface functionalization	136
5.5 Conclusions	139
5.6 Acknowledgments	140
5.7 Experimental Data	140
5.8 References	147
Chapter 6	
Towards a photo-switchable molecular rectifier	151
6.1 Introduction	152
6.2 Design of the rectifier	153
6.3 Synthesis	157
6.4 UV/Vis and ¹ H NMR analysis	159
6.5 Studies on Surface	163
6.6 Conclusions	164
6.7 Acknowledgments	164
6.8 Experimental Section	165
6.9 References	171

Chapter 7	
Maximized change in water contact angle for photoswitchable cucurbit[8]uril-mediated supramolecular monolayers on gold	173
7.1 Introduction	174
7.2 Synthesis	176
7.3 Photochemical isomerization studies in solution	177
7.4 Surface functionalization	181
7.5 Photochemical isomerization studies on surface	183
7.6 Conclusions	186
7.7 Acknowledgments	187
7.8 Experimental Data	187
7.9 References	198
Chapter 8	
Summary	203
8.1 Summary	204
8.2 Samenvatting	208
Acknowledgment	
Acknowledgment	213
