SPATIAL
ECONOMETRICS
ASSOCIATION

FEB Research Institute

SEA conference 2024

Fifty years ago the Dutchman Jean Pealinck introduced the term “Spatial Econometrics (see en.wikipedia.org/wiki/Spatial_econometrics). We want to celebrate this anniversary by looking back and forward fifty years at the XVIII World Conference of the Spatial Econometrics Association (SEA 2024) to be held in Groningen, the Netherlands.

During this conference you will:

- Receive individualized feedback from peers and experts on your paper
- Get inspirations from the latest development in spatial econometrics
- Extend your network with scholars that have similar methodological interests
